CIRCULATION RESEARCH

Volume 67 July–December 1990

VOLUME SUBJECT INDEX

A

Acetylcholine
Differences in the Electrophysiological Response of Canine Ventricular Subendocardium and Subepicardium to Acetylcholine and Isoproterenol: A Direct Effect of Acetylcholine in Ventricular Myocardium, 615
Endothelium-Derived Relaxing Factor Released From Canine Femoral Artery by Acetylcholine Cannot Be Identified as Free Nitric Oxide by Electron Paramagnetic Resonance Spectroscopy, 1446
Insignificant Bilateral Convergence of Preganglionic Vagal Fibers on Postganglionic Neurons to the Canine Heart, 556
Neurohormonal Control of Calcium Sensitivity of Myofilaments in Rat Single Heart Cells, 517

Acidosis
Effect of Acidosis on Intracellular pH and Calcium Concentration in the Newborn and Adult Rabbit Myocardium, 111
H^+-Induced Vasodilation of Rat Aorta Is Mediated by Alterations in Intracellular Calcium Sequestration, 426

Actin filaments
Disruption of Microtubules As an Early Sign of Irreversible Ischemic Injury: Immunohistochemical Study of In Situ Canine Hearts, 694
Mechanisms of Pulmonary Edema Induced by Tumor Necrosis Factor-α, 68

Action potential conduction
Electrotonic Influences on Action Potentials From Isolated Ventricular Cells, 1071

Action potential duration
Electrotonic Influences on Action Potentials From Isolated Ventricular Cells, 1071

Acute myocardial infarction
In Vivo Thrombin Inhibition Enhances and Sustains Arterial Recanalization With Recombinant Tissue-type Plasminogen Activator, 1552

Adenine nucleotide biosynthesis
β-Adrenergic Agonists Stimulate the Oxidative Pentose Phosphate Pathway in the Rat Heart, 1525

Adenosine
Evidence for Decreased Coronary Flow Reserve in Viable Postischemic Myocardium, 1201
Mechanism of Adenosine-Induced Inhibition of Calcium Current in Guinea Pig Ventricular Cells, 1134
Nonuniform Loss of Regional Flow Reserve During Myocardial Ischemia in Dogs, 253
Prolonged Impairment of Coronary Vasodilation After Reversible Ischemia: Evidence for Microvascular "Stunning," 332
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960
The Mechanism of Positive Inotropy Induced by Adenosine Triphosphate in Rat Heart, 1007

Adenosine analogue
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960

Adenosine antagonist
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960

Adenosine receptor
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960

Adenosine triphosphate
Regeneration of Myocardial Phosphocreatine in Pigs Despite Continued Moderate Ischemia, 1481

Adenylate cyclase activity
Differential Desensitization of A_1 Adenosine Receptor–Mediated Inhibition of Cardiac Myocyte Contractility and Adenylate Cyclase Activity: Relation to the Regulation of Receptor Affinity and Density, 406

Adhesion proteins
Integrin Receptors on Aortic Smooth Muscle Cells Mediate Adhesion to Fibronectin, Laminin, and Collagen, 175

ADP
Acute Impairment of Endothelium-Dependent Relaxations to Aggregating Platelets Following Reperfusion Injury in Canine Coronary Arteries, 385

α-Adrenergic receptors
Specific α_1-Adrenergic Receptor Subtypes Modulate Catecholamine-Induced Increases and Decreases in Ventricular Automaticity, 1535

β-Adrenergic stimulation
Calcium Current in Single Cells Isolated From Normal and Hypertrophied Rat Heart: Effects of β-Adrenergic Stimulation, 199

α-Adrenoceptors
α_1-Adrenergic Receptors in Pulmonary and Systemic Vascular Smooth Muscle: Alterations With Development and Pregnancy, 1193
Analysis of Pulmonary Vascular Responses in Cats to Sympathetic Nerve Stimulation Under Elevated Tone Conditions: Evidence That Neuronally Released Norepinephrine Acts on α_1-, α_2-, and β_2-Adrenoceptors, 862
Enhanced α_1-Adrenergic Responsiveness in Cardiomyopathic Hamster Cardiac Myocytes: Relation to the Expression of Pertussis Toxin–Sensitive G Protein and α_1-Adrenergic Receptors, 1182

β-Adrenoceptors
Analysis of Pulmonary Vascular Responses in Cats to Sympathetic Nerve Stimulation Under Elevated Tone Conditions: Evidence That Neuronally Released Norepinephrine Acts on α_1-, α_2-, and β_2-Adrenoceptors, 862
Experimental Sympathetic Activation Causes Endothelial Injury in the Rabbit Thoracic Aorta via β_1-Adrenoceptor Activation, 1027

β-Antagonists
Experimental Sympathetic Activation Causes Endothelial Injury in the Rabbit Thoracic Aorta via β_1-Adrenoceptor Activation, 1027

Aequorin
Effect of Protein Kinase C Activation on Sarcoplasmic Reticulum Function and Apparent Myofibrillar Ca^{2+} Sensitivity in Intact and Skinned Muscles From Normal and Diseased Human Myocardium, 744

Afterload
The Effects of Increasing Mean Arterial Pressure on Left Ventricular Output in Newborn Lambs, 78

Age effects
Age-Induced Decreases in the Messenger RNA Coding for the Sarcoplasmic Reticulum Ca^{2+}-ATPase of the Rat Heart, 230

Aging
Age-Related Decrease of Calcitonin Gene-Related Peptide–Containing Vasodilator Innervation in the Mesenteric Resistance Vessel of the Spontaneously Hypertensive Rat, 733
Myocyte Cell Loss and Myocyte Cellular Hyperplasia in the Hypertrophied Aging Rat Heart, 871

Aldosterone
Peripheral Chemoreceptor Control of Fetal Renin Responses to Hypoxia and Hypercapnia, 722
Remodeling of the Rat Right and Left Ventricles in Experimental Hypertension, 1355

Amiloride derivatives
Intracellular pH in Human Arterial Smooth Muscle: Regulation by Na^+/H^+ Exchange and a Novel 5-(*N*-Ethyl-*N*-isopropyl) amiloride–Sensitive Na^+- and HCO_3^--Dependent Mechanism, 814

Amiodarone
Effect of Amiodarone on the Expression of Myosin Isoforms and Cellular Growth of Cardiac Muscle Cells in Culture, 51

Anaphylatoxins
Contractile Effect of the Chemotactic Factors f-Met-Leu-Phe and C5a on the Human Isolated Umbilical Artery: Role of Cyclooxygenase Products and Tissue Macrophages, 1059

Angiogenesis
Influence of Extracellular Magnesium on Capillary Endothelial Cell Proliferation and Migration, 645

Angioplasty
Time Course of Smooth Muscle Cell Proliferation in the Intima and Media of Arteries Following Experimental Angioplasty, 651

Angiotensin I
Cardiac Angiotensinogen and Its Local Activation in the Isolated Perfused Beating Heart, 564

Angiotensin II
Baroreflex Control of Renal Sympathetic Nerve Activity Is Potentiated at Early Phase of Two-Kidney, One-Clip Goldblatt Hypertension in Conscious Rabbits, 1309
Cardiac Angiotensinogen and Its Local Activation in the Isolated Perfused Beating Heart, 564
Effect of Protein Intake on Regional Vascular Resistance and Reactivity to Angiotensin II in the Rat, 440
Peripheral Chemoreceptor Control of Fetal Renin Responses to Hypoxia and Hypercapnia, 722
Role of the Area Postrema in the Modulation of the Baroreflex Control of Heart Rate by Angiotensin II, 1462

Angiotensinogen
Cardiac Angiotensinogen and Its Local Activation in the Isolated Perfused Beating Heart, 564

Anisotropy
Directional Differences in Excitability and Margin of Safety for Propagation in Sheep Ventricular Epicardial Muscle, 97

Anthraquinone
Patterns of Interaction Between Anthraquinone Drugs and the Calcium-Release Channel from Cardiac Sarcoplasmic Reticulum, 272

Antigen-specific T cells
In Vivo Significance of T Cells in the Development of Coxsackievirus B3 Myocarditis in Mice: Immature but Antigen-Specific T Cells Aggravate Cardiac Injury, 589

Antihypertensive therapy
Collagen Phenotypes During Development and Regression of Myocardial Hypertrophy in Spontaneously Hypertensive Rats, 1474

Antivasoconstriction
Effects of Thrombosis on Vascular Tone in Rat Mesenteric Arteries With Endothelium In Vivo, 312

Aorta
α_1-Adrenergic Receptors in Pulmonary and Systemic Vascular Smooth Muscle: Alterations With Development and Pregnancy, 1193
Heterogeneous Distribution of a Diffusional Tracer in the Aortic Wall of Normal and Atherosclerotic Rabbits, 368

Aortic concentration profile
Visualization and Quantification of Transmural Concentration Profiles of Macromolecules Across the Arterial Wall, 11

Aortic rings
Differential Alteration of Vascular Reactivity in Rabbit Aorta With Modest Elevation of Serum Cholesterol, 550

Aortic sinus vortex
An In Vitro Study of the Onset of Turbulence in the Sinus of Valsalva, 448

Arachidonic acid
5,6-Epoxyeicosatrienoic Acid, a Novel Arachidonate Metabolite: Mechanism of Vasoactivity in the Rat, 1082
Regulation of K+ Channels in Cardiac Myocytes by Free Fatty Acids, 1040

Area postrema
Reflex Effect of Vasopressin After Blockade of V_1 Receptors in the Area Postrema, 265
Role of the Area Postrema in the Modulation of the Baroreflex Control of Heart Rate by Angiotensin II, 1462

Argatroban
In Vivo Thrombin Inhibition Enhances and Sustains Arterial Recanalization With Recombinant Tissue-type Plasminogen Activator, 1552

L-Arginine
L-Arginine Augments Endothelium-Dependent Vasodilation in Cholesterol-Fed Rabbits, 1301
N^G-Monomethyl L-Arginine Inhibits Endothelium-Derived Relaxing Factor–Stimulated Cyclic GMP Accumulation in Cocultures of Endothelial and Vascular Smooth Muscle Cells by an Action Specific to the Endothelial Cell, 979

Arginine vasopressin
Baroreflex Control of Renal Sympathetic Nerve Activity Is Potentiated at Early Phase of Two-Kidney, One-Clip Goldblatt Hypertension in Conscious Rabbits, 1309

Arrhythmia
Relation Between Transcardiac and Transthoracic Current During Defibrillation in Humans, 1420

Arrhythmias
β-Adrenergic–Mediated Influences on Microscopic Conduction in Epicardial Regions Overlying Infarcted Myocardium, 284
Electrode Radius Predicts Lesion Radius During Radiofrequency Energy Heating: Validation of a Proposed Thermodynamic Model, 124
Electrotonic Influences on Action Potentials From Isolated Ventricular Cells, 1071
Potentiation of Reperfusion-Associated Ventricular Fibrillation by Left Ventricular Hypertrophy, 501
Role of Calcium and the Calcium Channel in the Initiation and Maintenance of Ventricular Fibrillation, 1115
Vagal Modulation of the Rate-Dependent Properties of the Atrioventricular Node, 1152

Arrhythmogenesis
Reperfusion and Readmission of Oxygen: Pathophysiological Relevance of Oxygen-Derived Free Radicals to Arrhythmogenesis, 1211

Arterial injury
Smooth Muscle Cells Express Urokinase During Mitogenesis and Tissue-Type Plasminogen Activator During Migration in Injured Rat Carotid Artery, 61

Arterial pressure
Vasoactive Intestinal Polypeptide Facilitates Atrioventricular Nodal Conduction and Shortens Atrial and Ventricular Refractory Periods in Conscious and Anesthetized Dogs, 1323

Arterial wall transport
Visualization and Quantification of Transmural Concentration Profiles of Macromolecules Across the Arterial Wall, 11

Arterioles
Characterization of Vasopressin Actions in Isolated Submucosal Arterioles of the Intestinal Microcirculation, 1017

Arteriosclerosis
Integrin Receptors on Aortic Smooth Muscle Cells Mediate Adhesion to Fibronectin, Laminin, and Collagen, 175

Smooth Muscle Cells Express Urokinase During Mitogenesis and Tissue-Type Plasminogen Activator During Migration in Injured Rat Carotid Artery, 61

Atherosclerosis
Heterogeneous Distribution of a Diffusional Tracer in the Aortic Wall of Normal and Atherosclerotic Rabbits, 368
Time Course of Smooth Muscle Cell Proliferation in the Intima and Media of Arteries Following Experimental Angioplasty, 651

Athymic mice
In Vivo Significance of T Cells in the Development of Coxsackievirus B3 Myocarditis in Mice: Immature but Antigen-Specific T Cells Aggravate Cardiac Injury, 589

ATP
Intracellular pH in Human Arterial Smooth Muscle: Regulation by Na^+/H^+ Exchange and a Novel 5-(*N*-Ethyl-*N*-isopropyl) amiloride–Sensitive Na^+- and HCO_3^--Dependent Mechanism, 814
The Mechanism of Positive Inotropy Induced by Adenosine Triphosphate in Rat Heart, 1007

ATP-sensitive K^+ channel
Potassium Accumulation in the Globally Ischemic Mammalian Heart: A Role for the ATP-Sensitive Potassium Channel, 835
Regulation of K+ Channels in Cardiac Myocytes by Free Fatty Acids, 1040

ATP-sensitive K^+ current
Interrelation Between Pinacidil and Intracellular ATP Concentrations on Activation of the ATP-Sensitive K^+ Current in Guinea Pig Ventricular Myocytes, 1124

Atria
β-Adrenergic Regulation of the Muscarinic-Gated K^+ Channel via Cyclic AMP–Dependent Protein Kinase in Atrial Cells, 1292

Atrial blood flow
Dynamics of Atrial Peptide Secretion in the Coronary Circulation of the Conscious Dog, 609

Atrial flutter
Circus Movement Atrial Flutter in the Canine Sterile Pericarditis Model: Activation Patterns During Initiation, Termination, and Sustained Reentry In Vivo, 35

Atrial natriuretic factor
Dynamics of Atrial Peptide Secretion in the Coronary Circulation of the Conscious Dog, 609

Atrial natriuretic peptide
Determinants of Renal Actions of Atrial Natriuretic Peptide: Lack of Effect of Atrial Natriuretic Peptide on Pressure-Induced Vasoconstriction, 1
Diabetes-Induced Alterations in Atrial Natriuretic Peptide Gene Expression in Wistar-Kyoto and Spontaneously Hypertensive Rats, 803

Atrial secretion
Dynamics of Atrial Peptide Secretion in the Coronary Circulation of the Conscious Dog, 609

Atrioventricular conduction
Sinus and Atrioventricular Nodal Distribution of Sympathetic Fibers That Contain Neuropeptide Y, 713

Atrioventricular coupling
Nonuniform Regional Deformation of the Pericardium During the Cardiac Cycle in Dogs, 1107

Atrioventricular nodal conduction
Vasoactive Intestinal Polypeptide Facilitates Atrioventricular Nodal Conduction and Shortens Atrial and Ventricular Refractory Periods in Conscious and Anesthetized Dogs, 1323

Atrium
Brain Natriuretic Peptide–like Immunoreactive Innervation of the Cardiovascular and Cerebrovascular Systems in the Rat, 1345

Autocorrelation
Profound Spatial Heterogeneity of Coronary Reserve: Discordance Between Patterns of Resting and Maximal Myocardial Blood Flow, 319

Automatic implantable defibrillator
Relation Between Transcardiac and Transthoracic Current During Defibrillation in Humans, 1420

Autonomic ganglia
Insignificant Bilateral Convergence of Preganglionic Vagal Fibers on Postganglionic Neurons to the Canine Heart, 556

Autonomic nervous blockade
Neuropeptide Y Modulates Vasoconstriction in Coronary Microvessels in the Beating Canine Heart, 1142

Autonomic nervous system
Effects of the Spatial Dispersion of Acetylcholine Release on the Chronotropic Responses to Vagal Stimulation in Dogs, 844
Influence of Lung Volume on Sympathetic Nerve Discharge in Normal Humans, 130
Vasoactive Intestinal Polypeptide Facilitates Atrioventricular Nodal Conduction and Shortens Atrial and Ventricular Refractory Periods in Conscious and Anesthetized Dogs, 1323

Autoradiography
Functional and Autoradiographic Evidence for Endothelin 1 Receptors on Human and Rat Cardiac Myocytes: Comparison With Single Smooth Muscle Cells, 764
Heterogeneous Distribution of a Diffusional Tracer in the Aortic Wall of Normal and Atherosclerotic Rabbits, 368

AV node
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960
Vagal Modulation of the Rate-Dependent Properties of the Atrioventricular Node, 1152

B

Baroreceptor reflex
Baroreflex Control of Renal Sympathetic Nerve Activity Is Potentiated at Early Phase of Two-Kidney, One-Clip Goldblatt Hypertension in Conscious Rabbits, 1309

Baroreceptors
Dynamic and Static Conditioning Pressures Evoke Equivalent Rapid Resetting in Rat Aortic Baroreceptors, 303
Prostaglandins Contribute to Activation of Baroreceptors in Rabbits: Possible Paracrine Influence of Endothelium, 1394

Baroreflex
Dynamic and Static Conditioning Pressures Evoke Equivalent Rapid Resetting in Rat Aortic Baroreceptors, 303
Reflex Effect of Vasopressin After Blockade of V_1 Receptors in the Area Postrema, 265
Role of the Area Postrema in the Modulation of the Baroreflex Control of Heart Rate by Angiotensin II, 1462

Basilar artery
Dual Action of FRC8653, a Novel Dihydropyridine Derivative, on the Ba^{2+} Current Recorded From the Rabbit Basilar Artery, 993

Biphasic defibrillator waveforms
Increasing Fibrillation Duration Enhances Relative Asymmetrical Biphasic Versus Monophasic Defibrillator Waveform Efficacy, 376

α-Blockade
Synergistic Hypotensive Effect of Vasoactive Intestinal Polypeptide and α-Blockade With Phentolamine: Evidence for Vasoactive Intestinal Peptide α-Adrenoceptor Coupling in the Cardiovascular System of Newborn Dogs, 986

Blood flow regulation
Prostaglandins Mediate Arteriolar Dilation to Increased Blood Flow Velocity in Skeletal Muscle Microcirculation, 529

Blood pressure
Dynamic and Static Conditioning Pressures Evoke Equivalent Rapid Resetting in Rat Aortic Baroreceptors, 303
Peripheral Chemoreceptor Control of Fetal Renin Responses to Hypoxia and Hypercapnia, 722
Stimulation of $Serotonin_2$ Receptors in the Ventrolateral Medulla of the Cat Results in Nonuniform Increases in Sympathetic Outflow, 1267

Body fluid homeostasis
Angiotensin II–Induced Atrial Natriuretic Factor Release in Dogs Is Not Related to Hemodynamic Responses, 774

Body surface potential maps
Patterns of Body Surface Potential and Ventriculograms Specific to Occlusion of Subdivisions of the Coronary Arteries, 683
Bone marrow
Superoxide Anion Release From Blood and Bone Marrow Neutrophils Is Altered by Endotoxemia, 154
Bradykinin
Contribution of Endothelial Cells to Calcium-Dependent Fluorescence Transients in Rabbit Hearts Loaded With Indo 1, 415
Bromodeoxyuridine
Time Course of Smooth Muscle Cell Proliferation in the Intima and Media of Arteries Following Experimental Angioplasty, 651

C

Ca^{2+}-ATPase
Age-Induced Decreases in the Messenger RNA Coding for the Sarcoplasmic Reticulum Ca^{2+}-ATPase of the Rat Heart, 230
^{45}Ca flux
Inotropic and Calcium Kinetic Effects of Calcium Channel Agonist and Antagonist in Isolated Cardiac Myocytes From Cardiomyopathic Hamsters, 599
Calcitonin gene-related peptide
Age-Related Decrease of Calcitonin Gene-Related Peptide–Containing Vasodilator Innervation in the Mesenteric Resistance Vessel of the Spontaneously Hypertensive Rat, 733
Calcium
Contribution of Endothelial Cells to Calcium-Dependent Fluorescence Transients in Rabbit Hearts Loaded With Indo 1, 415
Effect of Thyroid Status on Thin-Filament Ca^{2+} Regulation and Expression of Troponin I in Perinatal and Adult Rat Hearts, 344
Forskolin Stimulates Prostaglandin Synthesis in Rabbit Heart by a Mechanism That Requires Calcium and Is Independent of Cyclic AMP, 1247
Sarcolemma, Sarcoplasmic Reticulum, and Sarcomeres As Limiting Factors in Force Production in Rat Heart, 913
Calcium agonist
Dual Action of FRC8653, a Novel Dihydropyridine Derivative, on the Ba^{2+} Current Recorded From the Rabbit Basilar Artery, 993
Calcium antagonists
Actions of Ca^{2+} Antagonists on Two Types of Ca^{2+} Channels in Rat Aorta Smooth Muscle Cells in Primary Culture, 469
Determinants of Renal Actions of Atrial Natriuretic Peptide: Lack of Effect of Atrial Natriuretic Peptide on Pressure-Induced Vasoconstriction, 1
Dual Action of FRC8653, a Novel Dihydropyridine Derivative, on the Ba^{2+} Current Recorded From the Rabbit Basilar Artery, 993
Calcium channels
Actions of Ca^{2+} Antagonists on Two Types of Ca^{2+} Channels in Rat Aorta Smooth Muscle Cells in Primary Culture, 469
Biphasic Effects of Doxorubicin on the Calcium Release Channel From Sarcoplasmic Reticulum of Cardiac Muscle, 1167
Dual Action of FRC8653, a Novel Dihydropyridine Derivative, on the Ba^{2+} Current Recorded From the Rabbit Basilar Artery, 993
Effect of Temperature on the Rise in Intracellular Sodium Caused by Calcium Depletion in Ferret Ventricular Muscle and the Mechanism of the Alleviation of the Calcium Paradox by Hypothermia, 1238
Inotropic and Calcium Kinetic Effects of Calcium Channel Agonist and Antagonist in Isolated Cardiac Myocytes From Cardiomyopathic Hamsters, 599
Mechanism of Adenosine-Induced Inhibition of Calcium Current in Guinea Pig Ventricular Cells, 1134
Role of Calcium and the Calcium Channel in the Initiation and Maintenance of Ventricular Fibrillation, 1115
Vagal Modulation of the Rate-Dependent Properties of the Atrioventricular Node, 1152
Calcium current
Calcium Current in Single Cells Isolated From Normal and Hypertrophied Rat Heart: Effects of β-Adrenergic Stimulation, 199
The Mechanism of Positive Inotropy Induced by Adenosine Triphosphate in Rat Heart, 1007
Calcium influx
H^+-Induced Vasodilation of Rat Aorta Is Mediated by Alterations in Intracellular Calcium Sequestration, 426
Calcium overload
Role of Calcium and the Calcium Channel in the Initiation and Maintenance of Ventricular Fibrillation, 1115
Calcium paradox
Effect of Temperature on the Rise in Intracellular Sodium Caused by Calcium Depletion in Ferret Ventricular Muscle and the Mechanism of the Alleviation of the Calcium Paradox by Hypothermia, 1238
Time Course of Cellular Enzyme Release in Dog Heart Injury, 1257
Calcium release
Digestion of Cardiac and Skeletal Muscle Junctional Sarcoplasmic Reticulum Vesicles With Calpain II: Effects on the Ca^{2+} Release Channel, 84
Isolated Guinea Pig Coronary Smooth Muscle Cells: Acetylcholine Induces Hyperpolarization Due to Sarcoplasmic Reticulum Calcium Release Activating Potassium Channels, 525
Patterns of Interaction Between Anthraquinone Drugs and the Calcium-Release Channel from Cardiac Sarcoplasmic Reticulum, 272
Calcium sequestration
H^+-Induced Vasodilation of Rat Aorta Is Mediated by Alterations in Intracellular Calcium Sequestration, 426
Calpain
Digestion of Cardiac and Skeletal Muscle Junctional Sarcoplasmic Reticulum Vesicles With Calpain II: Effects on the Ca^{2+} Release Channel, 84
Capillaries
Side-to-Side Slippage of Myocytes Participates in Ventricular Wall Remodeling Acutely After Myocardial Infarction in Rats, 23
Captopril
Collagen Phenotypes During Development and Regression of Myocardial Hypertrophy in Spontaneously Hypertensive Rats, 1474
Carbachol
Differential Alteration of Vascular Reactivity in Rabbit Aorta With Modest Elevation of Serum Cholesterol, 550
Cardiac
Patterns of Interaction Between Anthraquinone Drugs and the Calcium-Release Channel from Cardiac Sarcoplasmic Reticulum, 272
Cardiac action potential
Nonlinear Dynamics of Rate-Dependent Activation in Models of Single Cardiac Cells, 1510
Cardiac A_1 adenosine receptor
Differential Desensitization of A_1 Adenosine Receptor–Mediated Inhibition of Cardiac Myocyte Contractility and Adenylate Cyclase Activity: Relation to the Regulation of Receptor Affinity and Density, 406
Cardiac cells
The Mechanism of Positive Inotropy Induced by Adenosine Triphosphate in Rat Heart, 1007
Cardiac contractility
Enhanced α_1-Adrenergic Responsiveness in Cardiomyopathic Hamster Cardiac Myocytes: Relation to the Expression of Pertussis Toxin–Sensitive G Protein and α_1-Adrenergic Receptors, 1182
Cardiac development
Effect of Changes in Circulating Blood Volume on Cardiac Output and Arterial and Ventricular Blood Pressure in the Stage 18, 24, and 29 Chick Embryo, 187
Cardiac energetics
Effects of Bigeminies and Paired-Pulse Stimulation on Oxygen Consumption in Dog Left Ventricle, 142

Cardiac failure
Differential Effects of Cardiac Hypertrophy and Failure on Right Versus Left Ventricular Calcium Activation, 707
Cardiac hypertrophy
Differential Effects of Cardiac Hypertrophy and Failure on Right Versus Left Ventricular Calcium Activation, 707
Increased Ischemic Injury but Decreased Hypoxic Injury in Hypertrophied Rat Hearts, 948
Cardiac mechanics
Effects of Bigeminies and Paired-Pulse Stimulation on Oxygen Consumption in Dog Left Ventricle, 142
Evaluation of Left Ventricular Mechanical Restitution in Closed-Chest Dogs Based on Single-Beat Elastance, 1437
Cardiac muscle
Mechanism of Adenosine-Induced Inhibition of Calcium Current in Guinea Pig Ventricular Cells, 1134
Cardiac myocytes
Effect of Amiodarone on the Expression of Myosin Isoforms and Cellular Growth of Cardiac Muscle Cells in Culture, 51
Mechanism of Cytokine Inhibition of β-Adrenergic Agonist Stimulation of Cyclic AMP in Rat Cardiac Myocytes: Impairment of Signal Transduction, 753
Regulation of K+ Channels in Cardiac Myocytes by Free Fatty Acids, 1040
Cardiac output
Acute Respiratory Acidosis Decreases Left Ventricular Contractility but Increases Cardiac Output in Dogs, 628
Cardiac tamponade
Nonuniform Regional Deformation of the Pericardium During the Cardiac Cycle in Dogs, 1107
Cardiomyocytes
Developmental Changes in Cardiac Myocyte Calcium Regulation, 574
Functional and Autoradiographic Evidence for Endothelin 1 Receptors on Human and Rat Cardiac Myocytes: Comparison With Single Smooth Muscle Cells, 764
Cardiomyopathic hamsters
Enhanced α_1-Adrenergic Responsiveness in Cardiomyopathic Hamster Cardiac Myocytes: Relation to the Expression of Pertussis Toxin–Sensitive G Protein and α_1-Adrenergic Receptors, 1182
Inotropic and Calcium Kinetic Effects of Calcium Channel Agonist and Antagonist in Isolated Cardiac Myocytes From Cardiomyopathic Hamsters, 599
Messenger RNA Levels of Guanine Nucleotide–Binding Proteins Are Reduced in the Ventricle of Cardiomyopathic Hamsters, 235
Cardiomyopathy
Chronic Calcium Channel Blockade Prevents the Progression of Myocardial Contractile and Electrical Dysfunction in the Cardiomyopathic Syrian Hamster, 1381
Carotid artery
Brain Natriuretic Peptide–like Immunoreactive Innervation of the Cardiovascular and Cerebrovascular Systems in the Rat, 1345
Carotid body
Effect of Chemodenervation on the Cerebral Vascular and Microvascular Response to Hypoxia, 1365
Carotid sinus
Prostaglandins Contribute to Activation of Baroreceptors in Rabbits: Possible Paracrine Influence of Endothelium, 1394
Carotid stenosis
Detection of Moving Flow Separation in Pulsatile Flow and the Degree of Stenosis by Power of Doppler Shift Signals, 166
Catalase
Evidence Against the "Early Protection–Delayed Death" Hypothesis of Superoxide Disr utase Therapy in Experimental Myocardial Infarction: Polyethylene Glycol–Superoxide Dismutase Plus Catalase Does Not Limit Myocardial Infarct Size in Dogs, 636
Catecholamines
β-Adrenergic Agonists Stimulate the Oxidative Pentose Phosphate Pathway in the Rat Heart, 1525
β-Adrenergic–Mediated Influences on Microscopic Conduction in Epicardial Regions Overlying Infarcted Myocardium, 284
Neurohormonal Control of Calcium Sensitivity of Myofilaments in Rat Single Heart Cells, 517
Repeated Sympathetic Stimuli Elicit the Decline and Disappearance of Prostaglandin Modulation and an Increase of Vascular Resistance in Humans, 580
Specific α_1-Adrenergic Receptor Subtypes Modulate Catecholamine-Induced Increases and Decreases in Ventricular Automaticity, 1535
Catheter ablation
Electrode Radius Predicts Lesion Radius During Radiofrequency Energy Heating: Validation of a Proposed Thermodynamic Model, 124
CD18
Pulmonary Edema Induced by Phagocytosing Neutrophils: Protective Effect of Monoclonal Antibody Against Phagocyte CD18 Integrin, 795
Cell culture
Intracellular pH in Human Arterial Smooth Muscle: Regulation by Na^+/H^+ Exchange and a Novel 5-(*N*-Ethyl-*N*-isopropyl) amiloride–Sensitive Na^+- and HCO_3^--Dependent Mechanism, 814
Central sympathetic outflow
Stimulation of $Serotonin_2$ Receptors in the Ventrolateral Medulla of the Cat Results in Nonuniform Increases in Sympathetic Outflow, 1267
Cerebral arterioles
Effect of Chemodenervation on the Cerebral Vascular and Microvascular Response to Hypoxia, 1365
Cerebral blood flow
Effect of Chemodenervation on the Cerebral Vascular and Microvascular Response to Hypoxia, 1365
Cerebral blood flow autoregulation
Changes in Cerebrovascular Prostaglandins and Thromboxane as a Function of Systemic Blood Pressure: Cerebral Blood Flow Autoregulation of the Newborn, 674
Cerebral capillaries
Effect of Chemodenervation on the Cerebral Vascular and Microvascular Response to Hypoxia, 1365
Cerebral circulation
Mono-L-arginine–Containing Compounds Dilate Piglet Pial Arterioles Via an Endothelium-Derived Relaxing Factor–like Substance, 1374
Chamber theory
Calculation of Left Ventricular Wall Stress, 245
Chaos
Is Fibrillation Chaos?, 886
Chemiluminescence
Enhanced Chemiluminescence as a Measure of Oxygen-Derived Free Radical Generation During Ischemia and Reperfusion, 1453
Chemoreceptors
Peripheral Chemoreceptor Control of Fetal Renin Responses to Hypoxia and Hypercapnia, 722
Chemotactic peptides
Contractile Effect of the Chemotactic Factors f-Met-Leu-Phe and C5a on the Human Isolated Umbilical Artery: Role of Cyclooxygenase Products and Tissue Macrophages, 1059
Chick embryo
Effect of Changes in Circulating Blood Volume on Cardiac Output and Arterial and Ventricular Blood Pressure in the Stage 18, 24, and 29 Chick Embryo, 187
Chlorotetracycline
Ouabain Increases the Calcium Concentration in Intracellular Stores Involved in Stimulus–Response Coupling in Human Platelets, 1494
Cholesterol
L-Arginine Augments Endothelium-Dependent Vasodilation in Cholesterol-Fed Rabbits, 1301
Circle of Willis
Brain Natriuretic Peptide–like Immunoreactive Innervation of the Cardiovascular and Cerebrovascular Systems in the Rat, 1345

Cloning
Cloning and Characterization of a Vertebrate Cellular Myosin Regulatory Light Chain Complementary DNA, 933
Cocultures
N^G-Monomethyl L-Arginine Inhibits Endothelium-Derived Relaxing Factor–Stimulated Cyclic GMP Accumulation in Cocultures of Endothelial and Vascular Smooth Muscle Cells by an Action Specific to the Endothelial Cell, 979
Collagen
Collagen Phenotypes During Development and Regression of Myocardial Hypertrophy in Spontaneously Hypertensive Rats, 1474
Myocyte Cell Loss and Myocyte Cellular Hyperplasia in the Hypertrophied Aging Rat Heart, 871
Compliance
Starling Resistor Versus Compliance: Which Explains the Zero-Flow Pressure of a Dynamic Arterial Pressure-Flow Relation?, 209
Conduction velocity
β-Adrenergic–Mediated Influences on Microscopic Conduction in Epicardial Regions Overlying Infarcted Myocardium, 284
Directional Differences in Excitability and Margin of Safety for Propagation in Sheep Ventricular Epicardial Muscle, 97
Congestive heart failure
High-Dose Atrial Natriuretic Factor Enhances Albumin Escape From the Systemic but Not the Pulmonary Circulation, 461
Conscious rabbits
Baroreflex Control of Renal Sympathetic Nerve Activity Is Potentiated at Early Phase of Two-Kidney, One-Clip Goldblatt Hypertension in Conscious Rabbits, 1309
Contact force
Nonuniform Regional Deformation of the Pericardium During the Cardiac Cycle in Dogs, 1107
Continuity
Profound Spatial Heterogeneity of Coronary Reserve: Discordance Between Patterns of Resting and Maximal Myocardial Blood Flow, 319
Contractility
Acute Respiratory Acidosis Decreases Left Ventricular Contractility but Increases Cardiac Output in Dogs, 628
Dynamic Relation Between Myocardial Contractility and Energy Metabolism During and Following Brief Coronary Occlusion in the Pig, 490
Evaluation of Left Ventricular Mechanical Restitution in Closed-Chest Dogs Based on Single-Beat Elastance, 1437
Contraction
The Mechanism of Positive Inotropy Induced by Adenosine Triphosphate in Rat Heart, 1007
Coronary angiography
Patterns of Body Surface Potential and Ventriculograms Specific to Occlusion of Subdivisions of the Coronary Arteries, 683
Coronary artery
Endothelium-Derived Relaxing Factor Released From Canine Femoral Artery by Acetylcholine Cannot Be Identified as Free Nitric Oxide by Electron Paramagnetic Resonance Spectroscopy, 1446
Coronary blood flow
Profound Spatial Heterogeneity of Coronary Reserve: Discordance Between Patterns of Resting and Maximal Myocardial Blood Flow, 319
Prolonged Impairment of Coronary Vasodilation After Reversible Ischemia: Evidence for Microvascular "Stunning," 332
Regeneration of Myocardial Phosphocreatine in Pigs Despite Continued Moderate Ischemia, 1481
Coronary flow reserve
Evidence for Decreased Coronary Flow Reserve in Viable Postischemic Myocardium, 1201
Nonuniform Loss of Regional Flow Reserve During Myocardial Ischemia in Dogs, 253
Prolonged Impairment of Coronary Vasodilation After Reversible Ischemia: Evidence for Microvascular "Stunning", 332
Coronary microcirculation
Neuropeptide Y Modulates Vasoconstriction in Coronary Microvessels in the Beating Canine Heart, 1142
Coronary sinus ANF
Dynamics of Atrial Peptide Secretion in the Coronary Circulation of the Conscious Dog, 609
Coronary veins
Effects of Coronary Venous Pressure on Left Ventricular Diastolic Distensibility, 923
Coxsackievirus B3
Expression of Major Histocompatibility Complex Class I Antigen in Murine Ventricular Myocytes Infected With Coxsackievirus B3, 360
In Vivo Significance of T Cells in the Development of Coxsackievirus B3 Myocarditis in Mice: Immature but Antigen-Specific T Cells Aggravate Cardiac Injury, 589
Creatine kinase
Regional Changes in Creatine Kinase and Myocyte Size in Hypertensive and Nonhypertensive Cardiac Hypertrophy, 1334
Critical pressure
Starling Resistor Versus Compliance: Which Explains the Zero-Flow Pressure of a Dynamic Arterial Pressure-Flow Relation?, 209
Cultured atrial myocytes
Differential Desensitization of A_1 Adenosine Receptor–Mediated Inhibition of Cardiac Myocyte Contractility and Adenylate Cyclase Activity: Relation to the Regulation of Receptor Affinity and Density, 406
Cyclic AMP
β-Adrenergic Regulation of the Muscarinic-Gated K^+ Channel via Cyclic AMP–Dependent Protein Kinase in Atrial Cells, 1292
Forskolin Stimulates Prostaglandin Synthesis in Rabbit Heart by a Mechanism That Requires Calcium and Is Independent of Cyclic AMP, 1247
Mechanism of Cytokine Inhibition of β-Adrenergic Agonist Stimulation of Cyclic AMP in Rat Cardiac Myocytes: Impairment of Signal Transduction, 753
Cyclic GMP
Determinants of Renal Actions of Atrial Natriuretic Peptide: Lack of Effect of Atrial Natriuretic Peptide on Pressure-Induced Vasoconstriction, 1
N^G-Monomethyl L-Arginine Inhibits Endothelium-Derived Relaxing Factor–Stimulated Cyclic GMP Accumulation in Cocultures of Endothelial and Vascular Smooth Muscle Cells by an Action Specific to the Endothelial Cell, 979
Cyclooxygenase
5,6-Epoxyeicosatrienoic Acid, a Novel Arachidonate Metabolite: Mechanism of Vasoactivity in the Rat, 1082
Prostaglandins Contribute to Activation of Baroreceptors in Rabbits: Possible Paracrine Influence of Endothelium, 1394
Cytochrome P-450 monooxygenase
5,6-Epoxyeicosatrienoic Acid, a Novel Arachidonate Metabolite: Mechanism of Vasoactivity in the Rat, 1082
Cytokines
Mechanism of Cytokine Inhibition of β-Adrenergic Agonist Stimulation of Cyclic AMP in Rat Cardiac Myocytes: Impairment of Signal Transduction, 753
Cytoskeleton
Disruption of Microtubules As an Early Sign of Irreversible Ischemic Injury: Immunohistochemical Study of In Situ Canine Hearts, 694
Cytotoxic T lymphocyte
Expression of Major Histocompatibility Complex Class I Antigen in Murine Ventricular Myocytes Infected With Coxsackievirus B3, 360

D

Defibrillation
Increasing Fibrillation Duration Enhances Relative Asymmetrical Biphasic Versus Monophasic Defibrillator Waveform Efficacy, 376

Intrathoracic Current Flow During Transthoracic Defibrillation in Dogs: Transcardiac Current Fraction, 1405
Role of Calcium and the Calcium Channel in the Initiation and Maintenance of Ventricular Fibrillation, 1115

Defibrillation threshold
Intrathoracic Current Flow During Transthoracic Defibrillation in Dogs: Transcardiac Current Fraction, 1405

12-Deoxyphorbol 13 isobutyrate 20 acetate
Effect of Protein Kinase C Activation on Sarcoplasmic Reticulum Function and Apparent Myofibrillar Ca^{2+} Sensitivity in Intact and Skinned Muscles From Normal and Diseased Human Myocardium, 744

Desensitization
Differential Desensitization of A_1 Adenosine Receptor–Mediated Inhibition of Cardiac Myocyte Contractility and Adenylate Cyclase Activity: Relation to the Regulation of Receptor Affinity and Density, 406

Deterministic chaos
Nonlinear Dynamics of Rate-Dependent Activation in Models of Single Cardiac Cells, 1510

Development
Effect of Thyroid Status on Thin-Filament Ca^{2+} Regulation and Expression of Troponin I in Perinatal and Adult Rat Hearts, 344

Dexamethasone
Characterization of the Vascular Thromboxane A_2/Prostaglandin Endoperoxide Receptor in Rabbit Aorta: Regulation by Dexamethasone, 1562

Diabetes mellitus
Diabetes-Induced Alterations in Atrial Natriuretic Peptide Gene Expression in Wistar-Kyoto and Spontaneously Hypertensive Rats, 803

Diacylglycerol
Phospholamban and Troponin I Are Substrates for Protein Kinase C In Vitro but Not in Intact Beating Guinea Pig Hearts, 394

Diastole
Diastolic Viscous Properties of the Intact Canine Left Ventricle, 352

Diastolic ventricular interaction
Effects of Coronary Venous Pressure on Left Ventricular Diastolic Distensibility, 923

Dietary protein
Effect of Protein Intake on Regional Vascular Resistance and Reactivity to Angiotensin II in the Rat, 440

Diffusion
Heterogeneous Distribution of a Diffusional Tracer in the Aortic Wall of Normal and Atherosclerotic Rabbits, 368

Dihydropyridine derivative
Dual Action of FRC8653, a Novel Dihydropyridine Derivative, on the Ba^{2+} Current Recorded From the Rabbit Basilar Artery, 993

Dilation
Impaired Potassium-Induced Dilation in Hypertensive Rat Cerebral Arteries Does Not Reflect Altered Na^+,K^+-ATPase Dilation, 1035

Dipyridamole
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960

DNA synthesis
Effect of Amiodarone on the Expression of Myosin Isoforms and Cellular Growth of Cardiac Muscle Cells in Culture, 51

Doxorubicin
Biphasic Effects of Doxorubicin on the Calcium Release Channel From Sarcoplasmic Reticulum of Cardiac Muscle, 1167
Patterns of Interaction Between Anthraquinone Drugs and the Calcium-Release Channel from Cardiac Sarcoplasmic Reticulum, 272

E

Electrical coupling
Electrotonic Influences on Action Potentials From Isolated Ventricular Cells, 1071

Electrocardiogram
The Magnetocardiogram as Derived From Electrocardiographic Data, 1503

Electrocardiogram models
Is Fibrillation Chaos?, 886

Electron paramagnetic resonance
Endothelium-Derived Relaxing Factor Released From Canine Femoral Artery by Acetylcholine Cannot Be Identified as Free Nitric Oxide by Electron Paramagnetic Resonance Spectroscopy, 1446

Electrophysiology
Differences in the Electrophysiological Response of Canine Ventricular Subendocardium and Subepicardium to Acetylcholine and Isoproterenol: A Direct Effect of Acetylcholine in Ventricular Myocardium, 615
Vagal Modulation of the Rate-Dependent Properties of the Atrioventricular Node, 1152

Elevated tone
Analysis of Pulmonary Vascular Responses in Cats to Sympathetic Nerve Stimulation Under Elevated Tone Conditions: Evidence That Neuronally Released Norepinephrine Acts on α_1-, α_2-, and β_2-Adrenoceptors, 862

Endocardium
Differences in Transient Outward Currents of Feline Endocardial and Epicardial Myocytes, 1287

Endoperoxide
Characterization of the Vascular Thromboxane A_2/Prostaglandin Endoperoxide Receptor in Rabbit Aorta: Regulation by Dexamethasone, 1562

Endothelial injury
Experimental Sympathetic Activation Causes Endothelial Injury in the Rabbit Thoracic Aorta via β_1-Adrenoceptor Activation, 1027

Endothelial permeability
Pulmonary Edema Induced by Phagocytosing Neutrophils: Protective Effect of Monoclonal Antibody Against Phagocyte CD18 Integrin, 795

Endothelin
Functional and Autoradiographic Evidence for Endothelin 1 Receptors on Human and Rat Cardiac Myocytes: Comparison With Single Smooth Muscle Cells, 764

Endothelium
L-Arginine Augments Endothelium-Dependent Vasodilation in Cholesterol-Fed Rabbits, 1301
Comparative Behavior of Thrombin and an Inactive Derivative, FPR-Thrombin, Toward the Rabbit Vascular Endothelium: Heparin Liberates FPR-Thrombin From the Endothelium In Vivo, 221
Contribution of Endothelial Cells to Calcium-Dependent Fluorescence Transients in Rabbit Hearts Loaded With Indo 1, 415
Effects of Thrombosis on Vascular Tone in Rat Mesenteric Arteries With Endothelium In Vivo, 312
N^G-Monomethyl L-Arginine Inhibits Endothelium-Derived Relaxing Factor–Stimulated Cyclic GMP Accumulation in Cocultures of Endothelial and Vascular Smooth Muscle Cells by an Action Specific to the Endothelial Cell, 979
Prostaglandins Contribute to Activation of Baroreceptors in Rabbits: Possible Paracrine Influence of Endothelium, 1394

Endothelium-derived relaxing factor
L-Arginine Augments Endothelium-Dependent Vasodilation in Cholesterol-Fed Rabbits, 1301
Endothelium-Derived Relaxing Factor Released From Canine Femoral Artery by Acetylcholine Cannot Be Identified as Free Nitric Oxide by Electron Paramagnetic Resonance Spectroscopy, 1446
N^G-Monomethyl L-Arginine Inhibits Endothelium-Derived Relaxing Factor–Stimulated Cyclic GMP Accumulation in Cocultures of Endothelial and Vascular Smooth Muscle Cells by an Action Specific to the Endothelial Cell, 979
Mono-L-arginine–Containing Compounds Dilate Piglet Pial Arterioles Via an Endothelium-Derived Relaxing Factor–like Substance, 1374

Prostaglandins Mediate Arteriolar Dilation to Increased Blood Flow Velocity in Skeletal Muscle Microcirculation, 529

Endotoxin
Superoxide Anion Release From Blood and Bone Marrow Neutrophils Is Altered by Endotoxemia, 154

Energy deficit
Energy Demand, Supply, and Utilization in Hypoxia, and Force Recovery After Reoxygenation in Rabbit Heart Muscle, 1089

Energy metabolism
Dynamic Relation Between Myocardial Contractility and Energy Metabolism During and Following Brief Coronary Occlusion in the Pig, 490

Energy supply
Energy Demand, Supply, and Utilization in Hypoxia, and Force Recovery After Reoxygenation in Rabbit Heart Muscle, 1089

Entrainment
Nonlinear Dynamics of Rate-Dependent Activation in Models of Single Cardiac Cells, 1510

Epicardium
Differences in the Electrophysiological Response of Canine Ventricular Subendocardium and Subepicardium to Acetylcholine and Isoproterenol: A Direct Effect of Acetylcholine in Ventricular Myocardium, 615
Differences in Transient Outward Currents of Feline Endocardial and Epicardial Myocytes, 1287

Epoxides
5,6-Epoxyeicosatrienoic Acid, a Novel Arachidonate Metabolite: Mechanism of Vasoactivity in the Rat, 1082

Erythrolysate
Lymphatic Pumping in Response to Changes in Transmural Pressure Is Modulated by Erythrolysate/Hemoglobin, 1097

Excitation-contraction coupling
Digestion of Cardiac and Skeletal Muscle Junctional Sarcoplasmic Reticulum Vesicles With Calpain II: Effects on the Ca^{2+} Release Channel, 84

Exercise
Influence of Lung Volume on Sympathetic Nerve Discharge in Normal Humans, 130
Swimming Causes Myosin Adaptations in the Rat Cardiac Isograft, 780

Experimental myocarditis
In Vivo Significance of T Cells in the Development of Coxsackievirus B3 Myocarditis in Mice: Immature but Antigen-Specific T Cells Aggravate Cardiac Injury, 589

F

Fahraeus effect
Blood Flow in Microvascular Networks: Experiments and Simulation, 826

Fahraeus-Lindqvist effect
Blood Flow in Microvascular Networks: Experiments and Simulation, 826

Femoral artery
Endothelium-Derived Relaxing Factor Released From Canine Femoral Artery by Acetylcholine Cannot Be Identified as Free Nitric Oxide by Electron Paramagnetic Resonance Spectroscopy, 1446

Fibrillation
Is Fibrillation Chaos?, 886

Fibrinogen
Synergistic Inhibition of Platelet Aggregation by Fibrinogen-Related Peptides, 941

Fibroblastic growth factor
Influence of Extracellular Magnesium on Capillary Endothelial Cell Proliferation and Migration, 645

Fibrosis
Regulation of Fibrillar Collagen Types I and III and Basement Membrane Type IV Collagen Gene Expression in Pressure Overloaded Rat Myocardium, 787

Flow separation
An In Vitro Study of the Onset of Turbulence in the Sinus of Valsalva, 448
Detection of Moving Flow Separation in Pulsatile Flow and the Degree of Stenosis by Power of Doppler Shift Signals, 166

Fluorescence angiography
Neuropeptide Y Modulates Vasoconstriction in Coronary Microvessels in the Beating Canine Heart, 1142

Fluoromisonidazole
Fluoromisonidazole: A Metabolic Marker of Myocyte Hypoxia, 240

Force–interval relation
Evaluation of Left Ventricular Mechanical Restitution in Closed-Chest Dogs Based on Single-Beat Elastance, 1437

Forskolin
Forskolin Stimulates Prostaglandin Synthesis in Rabbit Heart by a Mechanism That Requires Calcium and Is Independent of Cyclic AMP, 1247

Forward problem
The Magnetocardiogram as Derived From Electrocardiographic Data, 1503

FPR-chloromethyl ketone
Comparative Behavior of Thrombin and an Inactive Derivative, FPR-Thrombin, Toward the Rabbit Vascular Endothelium: Heparin Liberates FPR-Thrombin From the Endothelium In Vivo, 221

FPR-thrombin
Comparative Behavior of Thrombin and an Inactive Derivative, FPR-Thrombin, Toward the Rabbit Vascular Endothelium: Heparin Liberates FPR-Thrombin From the Endothelium In Vivo, 221

Frank-Starling mechanism
Effect of Changes in Circulating Blood Volume on Cardiac Output and Arterial and Ventricular Blood Pressure in the Stage 18, 24, and 29 Chick Embryo, 187

Free fatty acid
Regulation of K+ Channels in Cardiac Myocytes by Free Fatty Acids, 1040

Free oxygen radicals
Evidence Against the "Early Protection–Delayed Death" Hypothesis of Superoxide Dismutase Therapy in Experimental Myocardial Infarction: Polyethylene Glycol–Superoxide Dismutase Plus Catalase Does Not Limit Myocardial Infarct Size in Dogs, 636

Free radicals
Oxidative Stress Alters Specific Membrane Currents in Isolated Cardiac Myoctyes, 535
Reperfusion and Readmission of Oxygen: Pathophysiological Relevance of Oxygen-Derived Free Radicals to Arrhythmogenesis, 1211

G

Gastrointestinal microcirculation
Characterization of Vasopressin Actions in Isolated Submucosal Arterioles of the Intestinal Microcirculation, 1017

Gene expression
Diabetes-Induced Alterations in Atrial Natriuretic Peptide Gene Expression in Wistar-Kyoto and Spontaneously Hypertensive Rats, 803
Regulation of Fibrillar Collagen Types I and III and Basement Membrane Type IV Collagen Gene Expression in Pressure Overloaded Rat Myocardium, 787

Gene switching
Effect of Thyroid Status on Thin-Filament Ca^{2+} Regulation and Expression of Troponin I in Perinatal and Adult Rat Hearts, 344

Glibenclamide
Potassium Accumulation in the Globally Ischemic Mammalian Heart: A Role for the ATP-Sensitive Potassium Channel, 835

Glucose-6-phosphate dehydrogenase
β-Adrenergic Agonists Stimulate the Oxidative Pentose Phosphate Pathway in the Rat Heart, 1525

Glycoside toxicity
Role of Calcium and the Calcium Channel in the Initiation and Maintenance of Ventricular Fibrillation, 1115

Guanine nucleotide–binding protein
Messenger RNA Levels of Guanine Nucleotide–Binding Proteins Are Reduced in the Ventricle of Cardiomyopathic Hamsters, 235

H

Hamsters
Chronic Calcium Channel Blockade Prevents the Progression of Myocardial Contractile and Electrical Dysfunction in the Cardiomyopathic Syrian Hamster, 1381

Heart
Calcium Current in Single Cells Isolated From Normal and Hypertrophied Rat Heart: Effects of β-Adrenergic Stimulation, 199
Cardiac Angiotensinogen and Its Local Activation in the Isolated Perfused Beating Heart, 564
Neurohormonal Control of Calcium Sensitivity of Myofilaments in Rat Single Heart Cells, 517
Phospholamban and Troponin I Are Substrates for Protein Kinase C In Vitro but Not in Intact Beating Guinea Pig Hearts, 394

Heart failure
Myocyte Cell Loss and Myocyte Cellular Hyperplasia in the Hypertrophied Aging Rat Heart, 871

Heart function
β-Adrenergic Agonists Stimulate the Oxidative Pentose Phosphate Pathway in the Rat Heart, 1525

Heart mechanics
Calculation of Left Ventricular Wall Stress, 245

Heart rate
Baroreflex Control of Renal Sympathetic Nerve Activity Is Potentiated at Early Phase of Two-Kidney, One-Clip Goldblatt Hypertension in Conscious Rabbits, 1309
Effects of the Spatial Dispersion of Acetylcholine Release on the Chronotropic Responses to Vagal Stimulation in Dogs, 844
Insignificant Bilateral Convergence of Preganglionic Vagal Fibers on Postganglionic Neurons to the Canine Heart, 556
Peripheral Chemoreceptor Control of Fetal Renin Responses to Hypoxia and Hypercapnia, 722
Role of the Area Postrema in the Modulation of the Baroreflex Control of Heart Rate by Angiotensin II, 1462
Sinus and Atrioventricular Nodal Distribution of Sympathetic Fibers That Contain Neuropeptide Y, 713
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960
Stimulation of Serotonin$_2$ Receptors in the Ventrolateral Medulla of the Cat Results in Nonuniform Increases in Sympathetic Outflow, 1267
Synergistic Hypotensive Effect of Vasoactive Intestinal Polypeptide and α-Blockade With Phentolamine: Evidence for Vasoactive Intestinal Peptide α-Adrenoceptor Coupling in the Cardiovascular System of Newborn Dogs, 986
Vasoactive Intestinal Polypeptide Facilitates Atrioventricular Nodal Conduction and Shortens Atrial and Ventricular Refractory Periods in Conscious and Anesthetized Dogs, 1323

Heat production
Heat Released During Relaxation Equals Force-Length Area in Isometric Contractions of Rabbit Papillary Muscle, 893

Hematocrit
High-Dose Atrial Natriuretic Factor Enhances Albumin Escape From the Systemic but Not the Pulmonary Circulation, 461

Hemicholinium-3
Insignificant Bilateral Convergence of Preganglionic Vagal Fibers on Postganglionic Neurons to the Canine Heart, 556

Hemodynamic transients
Pulmonary Model to Predict the Effects of Series Ventricular Interaction, 1225

Hemodynamics
An In Vitro Study of the Onset of Turbulence in the Sinus of Valsalva, 448
Angiotensin II–Induced Atrial Natriuretic Factor Release in Dogs Is Not Related to Hemodynamic Responses, 774
Effect of Changes in Circulating Blood Volume on Cardiac Output and Arterial and Ventricular Blood Pressure in the Stage 18, 24, and 29 Chick Embryo, 187

Hemoglobin
Lymphatic Pumping in Response to Changes in Transmural Pressure Is Modulated by Erythrolysate/Hemoglobin, 1097

Heparin
Comparative Behavior of Thrombin and an Inactive Derivative, FPR-Thrombin, Toward the Rabbit Vascular Endothelium: Heparin Liberates FPR-Thrombin From the Endothelium In Vivo, 221

Heterotopic heart transplant
Swimming Causes Myosin Adaptations in the Rat Cardiac Isograft, 780

Horseradish peroxidase
Visualization and Quantification of Transmural Concentration Profiles of Macromolecules Across the Arterial Wall, 11

Host defense
Superoxide Anion Release From Blood and Bone Marrow Neutrophils Is Altered by Endotoxemia, 154

Human platelets
Ouabain Increases the Calcium Concentration in Intracellular Stores Involved in Stimulus–Response Coupling in Human Platelets, 1494

Hypercapnia
Acute Respiratory Acidosis Decreases Left Ventricular Contractility but Increases Cardiac Output in Dogs, 628

Hypercholesterolemia
Differential Alteration of Vascular Reactivity in Rabbit Aorta With Modest Elevation of Serum Cholesterol, 550

Hypertension
Age-Related Decrease of Calcitonin Gene-Related Peptide–Containing Vasodilator Innervation in the Mesenteric Resistance Vessel of the Spontaneously Hypertensive Rat, 733
Impaired Potassium-Induced Dilation in Hypertensive Rat Cerebral Arteries Does Not Reflect Altered Na^+,K^+-ATPase Dilation, 1035
Regional Changes in Creatine Kinase and Myocyte Size in Hypertensive and Nonhypertensive Cardiac Hypertrophy, 1334

Hypertrophy
Calcium Current in Single Cells Isolated From Normal and Hypertrophied Rat Heart: Effects of β-Adrenergic Stimulation, 199
Regional Changes in Creatine Kinase and Myocyte Size in Hypertensive and Nonhypertensive Cardiac Hypertrophy, 1334
Regulation of Fibrillar Collagen Types I and III and Basement Membrane Type IV Collagen Gene Expression in Pressure Overloaded Rat Myocardium, 787
Swimming Causes Myosin Adaptations in the Rat Cardiac Isograft, 780

Hypotension
Synergistic Hypotensive Effect of Vasoactive Intestinal Polypeptide and α-Blockade With Phentolamine: Evidence for Vasoactive Intestinal Peptide α-Adrenoceptor Coupling in the Cardiovascular System of Newborn Dogs, 986

Hypothermia
Effect of Temperature on the Rise in Intracellular Sodium Caused by Calcium Depletion in Ferret Ventricular Muscle and the Mechanism of the Alleviation of the Calcium Paradox by Hypothermia, 1238

Hypoxanthine
Xanthine Oxidoreductase Activity in Perfused Hearts of Various Species, Including Humans, 770

Hypoxia
Effect of Chemodenervation on the Cerebral Vascular and Microvascular Response to Hypoxia, 1365
Energy Demand, Supply, and Utilization in Hypoxia, and Force Recovery After Reoxygenation in Rabbit Heart Muscle, 1089
Fluoromisonidazole: A Metabolic Marker of Myocyte Hypoxia, 240
Increased Ischemic Injury but Decreased Hypoxic Injury in Hypertrophied Rat Hearts, 948
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960

I

Immunohistochemistry
Disruption of Microtubules As an Early Sign of Irreversible Ischemic Injury: Immunohistochemical Study of In Situ Canine Hearts, 694

Indo 1
Contribution of Endothelial Cells to Calcium-Dependent Fluorescence Transients in Rabbit Hearts Loaded With Indo 1, 415

Infarction
Side-to-Side Slippage of Myocytes Participates in Ventricular Wall Remodeling Acutely After Myocardial Infarction in Rats, 23

Integrins
Integrin Receptors on Aortic Smooth Muscle Cells Mediate Adhesion to Fibronectin, Laminin, and Collagen, 175

Intercellular coupling
Directional Differences in Excitability and Margin of Safety for Propagation in Sheep Ventricular Epicardial Muscle, 97

Interferon gamma
Expression of Major Histocompatibility Complex Class I Antigen in Murine Ventricular Myocytes Infected With Coxsackievirus B3, 360

Interstitial fibrosis
Remodeling of the Rat Right and Left Ventricles in Experimental Hypertension, 1355

Intimal thickening
Smooth Muscle Cells Express Urokinase During Mitogenesis and Tissue-Type Plasminogen Activator During Migration in Injured Rat Carotid Artery, 61

Intracellular ATP
Interrelation Between Pinacidil and Intracellular ATP Concentrations on Activation of the ATP-Sensitive K^+ Current in Guinea Pig Ventricular Myocytes, 1124

Intracellular calcium
Effect of Acidosis on Intracellular pH and Calcium Concentration in the Newborn and Adult Rabbit Myocardium, 111
Enhanced α_1-Adrenergic Responsiveness in Cardiomyopathic Hamster Cardiac Myocytes: Relation to the Expression of Pertussis Toxin–Sensitive G Protein and α_1-Adrenergic Receptors, 1182

Intracellular pH
Effect of Acidosis on Intracellular pH and Calcium Concentration in the Newborn and Adult Rabbit Myocardium, 111
Intracellular pH in Human Arterial Smooth Muscle: Regulation by Na^+/H^+ Exchange and a Novel 5-(*N*-Ethyl-*N*-isopropyl) amiloride–Sensitive Na^+- and HCO_3^--Dependent Mechanism, 814

Intracellular potassium
Potassium-39 Nuclear Magnetic Resonance Observation of Intracellular Potassium Without Chemical Shift Reagents During Metabolic Inhibition in the Isolated Perfused Rat Heart, 401

Intracellular sodium
Effect of Temperature on the Rise in Intracellular Sodium Caused by Calcium Depletion in Ferret Ventricular Muscle and the Mechanism of the Alleviation of the Calcium Paradox by Hypothermia, 1238

Intramyocardial blood volume
Effects of Coronary Venous Pressure on Left Ventricular Diastolic Distensibility, 923

Intravital microscope
Neuropeptide Y Modulates Vasoconstriction in Coronary Microvessels in the Beating Canine Heart, 1142

Ion channels
Oxidative Stress Alters Specific Membrane Currents in Isolated Cardiac Myoctyes, 535

Irreversible ischemic injury
Disruption of Microtubules As an Early Sign of Irreversible Ischemic Injury: Immunohistochemical Study of In Situ Canine Hearts, 694

Ischemia
Acute Impairment of Endothelium-Dependent Relaxations to Aggregating Platelets Following Reperfusion Injury in Canine Coronary Arteries, 385
Correlation Between Transmural High Energy Phosphate Levels and Myocardial Blood Flow in the Presence of Graded Coronary Stenosis, 660
Increased Ischemic Injury but Decreased Hypoxic Injury in Hypertrophied Rat Hearts, 948
Potassium Accumulation in the Globally Ischemic Mammalian Heart: A Role for the ATP-Sensitive Potassium Channel, 835
Regulation of K+ Channels in Cardiac Myocytes by Free Fatty Acids, 1040

Isoenzyme
Regional Changes in Creatine Kinase and Myocyte Size in Hypertensive and Nonhypertensive Cardiac Hypertrophy, 1334

Isolated adult cardiac myocytes
Inotropic and Calcium Kinetic Effects of Calcium Channel Agonist and Antagonist in Isolated Cardiac Myocytes From Cardiomyopathic Hamsters, 599

Isolated heart
Xanthine Oxidoreductase Activity in Perfused Hearts of Various Species, Including Humans, 770

Isolated perfused rat heart
Increased Ischemic Injury but Decreased Hypoxic Injury in Hypertrophied Rat Hearts, 948

Isolated smooth muscle cells
Functional and Autoradiographic Evidence for Endothelin 1 Receptors on Human and Rat Cardiac Myocytes: Comparison With Single Smooth Muscle Cells, 764

Isolated working rabbit heart
Increasing Fibrillation Duration Enhances Relative Asymmetrical Biphasic Versus Monophasic Defibrillator Waveform Efficacy, 376

Isoproterenol
β-Adrenergic Regulation of the Muscarinic-Gated K^+ Channel via Cyclic AMP–Dependent Protein Kinase in Atrial Cells, 1292
Differences in the Electrophysiological Response of Canine Ventricular Subendocardium and Subepicardium to Acetylcholine and Isoproterenol: A Direct Effect of Acetylcholine in Ventricular Myocardium, 615
Differential Alteration of Vascular Reactivity in Rabbit Aorta With Modest Elevation of Serum Cholesterol, 550
Sarcolemma, Sarcoplasmic Reticulum, and Sarcomeres As Limiting Factors in Force Production in Rat Heart, 913
The Mechanism of Positive Inotropy Induced by Adenosine Triphosphate in Rat Heart, 1007
Vasoactive Intestinal Polypeptide Facilitates Atrioventricular Nodal Conduction and Shortens Atrial and Ventricular Refractory Periods in Conscious and Anesthetized Dogs, 1323

Isotope dilution
In Vivo Measurement of Myocardial Protein Turnover Using an Indicator Dilution Technique, 902

K

K^+ channel opener
Interrelation Between Pinacidil and Intracellular ATP Concentrations on Activation of the ATP-Sensitive K^+ Current in Guinea Pig Ventricular Myocytes, 1124

Kallikrein gene
Kallikrein Messenger RNA in Rat Arteries and Veins, 510

Kallikrein-kinin system
Kallikrein Messenger RNA in Rat Arteries and Veins, 510

Kidney
Angiotensin II–Induced Atrial Natriuretic Factor Release in Dogs Is Not Related to Hemodynamic Responses, 774

L

Lactate production
Potassium Accumulation in the Globally Ischemic Mammalian Heart: A Role for the ATP-Sensitive Potassium Channel, 835

Left ventricle
Acute Respiratory Acidosis Decreases Left Ventricular Contractility but Increases Cardiac Output in Dogs, 628
Diastolic Viscous Properties of the Intact Canine Left Ventricle, 352
Differences in Transient Outward Currents of Feline Endocardial and Epicardial Myocytes, 1287
Potentiation of Reperfusion-Associated Ventricular Fibrillation by Left Ventricular Hypertrophy, 501
Pulmonary Model to Predict the Effects of Series Ventricular Interaction, 1225
Left ventricular hypertrophy
Remodeling of the Rat Right and Left Ventricles in Experimental Hypertension, 1355
Lung
Effects of Dextran 70 on Hemodynamics and Lung Liquid and Protein Exchange in Awake Sheep, 852
Superoxide Anion Release From Blood and Bone Marrow Neutrophils Is Altered by Endotoxemia, 154
Lymph flow
Effects of Dextran 70 on Hemodynamics and Lung Liquid and Protein Exchange in Awake Sheep, 852
Lymph protein concentration
Effects of Dextran 70 on Hemodynamics and Lung Liquid and Protein Exchange in Awake Sheep, 852
Lymphatic vessel
Lymphatic Pumping in Response to Changes in Transmural Pressure Is Modulated by Erythrolysate/Hemoglobin, 1097

M

Macromolecular transport
Visualization and Quantification of Transmural Concentration Profiles of Macromolecules Across the Arterial Wall, 11
Macrophage-dependent vasoconstrictor response
Contractile Effect of the Chemotactic Factors f-Met-Leu-Phe and C5a on the Human Isolated Umbilical Artery: Role of Cyclooxygenase Products and Tissue Macrophages, 1059
Magnetic resonance spectroscopy
Dynamic Relation Between Myocardial Contractility and Energy Metabolism During and Following Brief Coronary Occlusion in the Pig, 490
Magnetocardiogram
The Magnetocardiogram as Derived From Electrocardiographic Data, 1503
Major histocompatibility complex
Expression of Major Histocompatibility Complex Class I Antigen in Murine Ventricular Myocytes Infected With Coxsackievirus B3, 360
Mathematical model
Nonlinear Dynamics of Rate-Dependent Activation in Models of Single Cardiac Cells, 1510
Mean arterial pressure
Synergistic Hypotensive Effect of Vasoactive Intestinal Polypeptide and α-Blockade With Phentolamine: Evidence for Vasoactive Intestinal Peptide α-Adrenoceptor Coupling in the Cardiovascular System of Newborn Dogs, 986
Mesenteric circulation
Effect of Protein Intake on Regional Vascular Resistance and Reactivity to Angiotensin II in the Rat, 440
Metabolic inhibition
Potassium-39 Nuclear Magnetic Resonance Observation of Intracellular Potassium Without Chemical Shift Reagents During Metabolic Inhibition in the Isolated Perfused Rat Heart, 401
Microinjection
Reflex Effect of Vasopressin After Blockade of V_1 Receptors in the Area Postrema, 265
Microspheres
Dynamics of Atrial Peptide Secretion in the Coronary Circulation of the Conscious Dog, 609
Microtubules
Disruption of Microtubules As an Early Sign of Irreversible Ischemic Injury: Immunohistochemical Study of In Situ Canine Hearts, 694
Microvascular filtration
Effects of Dextran 70 on Hemodynamics and Lung Liquid and Protein Exchange in Awake Sheep, 852
Microvascular networks
Blood Flow in Microvascular Networks: Experiments and Simulation, 826
Microvessel hematocrit
Blood Flow in Microvascular Networks: Experiments and Simulation, 826
Mitosis
Time Course of Smooth Muscle Cell Proliferation in the Intima and Media of Arteries Following Experimental Angioplasty, 651
Mitoxantrone
Patterns of Interaction Between Anthraquinone Drugs and the Calcium-Release Channel from Cardiac Sarcoplasmic Reticulum, 272
Monoclonal antibodies
Pulmonary Edema Induced by Phagocytosing Neutrophils: Protective Effect of Monoclonal Antibody Against Phagocyte CD18 Integrin, 795
N^G-Monomethyl L-arginine
N^G-Monomethyl L-Arginine Inhibits Endothelium-Derived Relaxing Factor–Stimulated Cyclic GMP Accumulation in Cocultures of Endothelial and Vascular Smooth Muscle Cells by an Action Specific to the Endothelial Cell, 979
Morphometry
Myocyte Cell Loss and Myocyte Cellular Hyperplasia in the Hypertrophied Aging Rat Heart, 871
mRNA
Messenger RNA Levels of Guanine Nucleotide–Binding Proteins Are Reduced in the Ventricle of Cardiomyopathic Hamsters, 235
Multivariate analysis
Patterns of Body Surface Potential and Ventriculograms Specific to Occlusion of Subdivisions of the Coronary Arteries, 683
Muscarinic potassium channel
β-Adrenergic Regulation of the Muscarinic-Gated K^+ Channel via Cyclic AMP–Dependent Protein Kinase in Atrial Cells, 1292
Myocardial enzymes
Time Course of Cellular Enzyme Release in Dog Heart Injury, 1257
Myocardial function
Regeneration of Myocardial Phosphocreatine in Pigs Despite Continued Moderate Ischemia, 1481
Myocardial infarction
Evidence Against the "Early Protection–Delayed Death" Hypothesis of Superoxide Dismutase Therapy in Experimental Myocardial Infarction: Polyethylene Glycol–Superoxide Dismutase Plus Catalase Does Not Limit Myocardial Infarct Size in Dogs, 636
β-Adrenergic–Mediated Influences on Microscopic Conduction in Epicardial Regions Overlying Infarcted Myocardium, 284
Myocardial ischemia
Reperfusion and Readmission of Oxygen: Pathophysiological Relevance of Oxygen-Derived Free Radicals to Arrhythmogenesis, 1211
Myocardial ischemia and reperfusion
Enhanced Chemiluminescence as a Measure of Oxygen-Derived Free Radical Generation During Ischemia and Reperfusion, 1453
Myocardial metabolism
Regeneration of Myocardial Phosphocreatine in Pigs Despite Continued Moderate Ischemia, 1481
Myocardial oxygen consumption
Regeneration of Myocardial Phosphocreatine in Pigs Despite Continued Moderate Ischemia, 1481
Myocardial reperfusion
Evidence for Decreased Coronary Flow Reserve in Viable Postischemic Myocardium, 1201
Prolonged Impairment of Coronary Vasodilation After Reversible Ischemia: Evidence for Microvascular "Stunning," 332

Myocardium
In Vivo Measurement of Myocardial Protein Turnover Using an Indicator Dilution Technique, 902
Myocyte Cell Loss and Myocyte Cellular Hyperplasia in the Hypertrophied Aging Rat Heart, 871
Regulation of Fibrillar Collagen Types I and III and Basement Membrane Type IV Collagen Gene Expression in Pressure Overloaded Rat Myocardium, 787
Myocyte contractility
Differential Desensitization of A_1 Adenosine Receptor–Mediated Inhibition of Cardiac Myocyte Contractility and Adenylate Cyclase Activity: Relation to the Regulation of Receptor Affinity and Density, 406
Myocyte nuclei
Side-to-Side Slippage of Myocytes Participates in Ventricular Wall Remodeling Acutely After Myocardial Infarction in Rats, 23
Myocytes
Fluoromisonidazole: A Metabolic Marker of Myocyte Hypoxia, 240
Side-to-Side Slippage of Myocytes Participates in Ventricular Wall Remodeling Acutely After Myocardial Infarction in Rats, 23
Myofilaments
Differential Effects of Cardiac Hypertrophy and Failure on Right Versus Left Ventricular Calcium Activation, 707
Effect of Thyroid Status on Thin-Filament Ca^{2+} Regulation and Expression of Troponin I in Perinatal and Adult Rat Hearts, 344
Myosin isoenzymes
Effect of Amiodarone on the Expression of Myosin Isoforms and Cellular Growth of Cardiac Muscle Cells in Culture, 51
Swimming Causes Myosin Adaptations in the Rat Cardiac Isograft, 780
Myosin regulatory light chain
Cloning and Characterization of a Vertebrate Cellular Myosin Regulatory Light Chain Complementary DNA, 933

N

Neonate
Mono-L-arginine–Containing Compounds Dilate Piglet Pial Arterioles Via an Endothelium-Derived Relaxing Factor–like Substance, 1374
Neuropeptide Y
Sinus and Atrioventricular Nodal Distribution of Sympathetic Fibers That Contain Neuropeptide Y, 713
Neutrophil activation
Superoxide Anion Release From Blood and Bone Marrow Neutrophils Is Altered by Endotoxemia, 154
Neutrophils
Pulmonary Edema Induced by Phagocytosing Neutrophils: Protective Effect of Monoclonal Antibody Against Phagocyte CD18 Integrin, 795
Newborn
Changes in Cerebrovascular Prostaglandins and Thromboxane as a Function of Systemic Blood Pressure: Cerebral Blood Flow Autoregulation of the Newborn, 674
Newborn myocyte
Effect of Acidosis on Intracellular pH and Calcium Concentration in the Newborn and Adult Rabbit Myocardium, 111
Nitric oxide
Endothelium-Derived Relaxing Factor Released From Canine Femoral Artery by Acetylcholine Cannot Be Identified as Free Nitric Oxide by Electron Paramagnetic Resonance Spectroscopy, 1446
Nitroimidazoles
Fluoromisonidazole: A Metabolic Marker of Myocyte Hypoxia, 240
Nitroprusside
Determinants of Renal Actions of Atrial Natriuretic Peptide: Lack of Effect of Atrial Natriuretic Peptide on Pressure-Induced Vasoconstriction, 1
Differential Alteration of Vascular Reactivity in Rabbit Aorta With Modest Elevation of Serum Cholesterol, 550
Nitrosylhemoglobin
Endothelium-Derived Relaxing Factor Released From Canine Femoral Artery by Acetylcholine Cannot Be Identified as Free Nitric Oxide by Electron Paramagnetic Resonance Spectroscopy, 1446
NMR
Correlation Between Transmural High Energy Phosphate Levels and Myocardial Blood Flow in the Presence of Graded Coronary Stenosis, 660
Potassium-39 Nuclear Magnetic Resonance Observation of Intracellular Potassium Without Chemical Shift Reagents During Metabolic Inhibition in the Isolated Perfused Rat Heart, 401
Nonadrenergic, noncholinergic nerves
Age-Related Decrease of Calcitonin Gene-Related Peptide–Containing Vasodilator Innervation in the Mesenteric Resistance Vessel of the Spontaneously Hypertensive Rat, 733
No-reflow
Evidence for Decreased Coronary Flow Reserve in Viable Postischemic Myocardium, 1201
Norepinephrine
H^+-Induced Vasodilation of Rat Aorta Is Mediated by Alterations in Intracellular Calcium Sequestration, 426
Northern blot analysis
Messenger RNA Levels of Guanine Nucleotide–Binding Proteins Are Reduced in the Ventricle of Cardiomyopathic Hamsters, 235
Nucleoside transport
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960

O

Opsonized zymosan
Pulmonary Edema Induced by Phagocytosing Neutrophils: Protective Effect of Monoclonal Antibody Against Phagocyte CD18 Integrin, 795
Ouabain
Ouabain Increases the Calcium Concentration in Intracellular Stores Involved in Stimulus–Response Coupling in Human Platelets, 1494
Oxidant stress
Exacerbation of Reperfusion Arrhythmias by Sudden Oxidant Stress, 481
Oxidative stress
Oxidative Stress Alters Specific Membrane Currents in Isolated Cardiac Myoctyes, 535
Oxygen
Reperfusion and Readmission of Oxygen: Pathophysiological Relevance of Oxygen-Derived Free Radicals to Arrhythmogenesis, 1211
Oxygen radicals
Enhanced Chemiluminescence as a Measure of Oxygen-Derived Free Radical Generation During Ischemia and Reperfusion, 1453

P

Papaverine
Prolonged Impairment of Coronary Vasodilation After Reversible Ischemia: Evidence for Microvascular "Stunning," 332
Papillary muscle
Chronic Calcium Channel Blockade Prevents the Progression of Myocardial Contractile and Electrical Dysfunction in the Cardiomyopathic Syrian Hamster, 1381
Parallel occlusion
Prostaglandins Mediate Arteriolar Dilation to Increased Blood Flow Velocity in Skeletal Muscle Microcirculation, 529
Parasympathetic nervous system
Effects of the Spatial Dispersion of Acetylcholine Release on the Chronotropic Responses to Vagal Stimulation in Dogs, 844
Insignificant Bilateral Convergence of Preganglionic Vagal Fibers on Postganglionic Neurons to the Canine Heart, 556

Sinus and Atrioventricular Nodal Distribution of Sympathetic Fibers That Contain Neuropeptide Y, 713

PEG-SOD
Evidence Against the "Early Protection–Delayed Death" Hypothesis of Superoxide Dismutase Therapy in Experimental Myocardial Infarction: Polyethylene Glycol–Superoxide Dismutase Plus Catalase Does Not Limit Myocardial Infarct Size in Dogs, 636

Peptides
Neuropeptide Y Modulates Vasoconstriction in Coronary Microvessels in the Beating Canine Heart, 1142
Synergistic Inhibition of Platelet Aggregation by Fibrinogen-Related Peptides, 941

Pericardial dimension
Nonuniform Regional Deformation of the Pericardium During the Cardiac Cycle in Dogs, 1107

Pericardial pressure
Nonuniform Regional Deformation of the Pericardium During the Cardiac Cycle in Dogs, 1107

Pericarditis
Circus Movement Atrial Flutter in the Canine Sterile Pericarditis Model: Activation Patterns During Initiation, Termination, and Sustained Reentry In Vivo, 35

Peripheral chemoreceptors
Effect of Chemodenervation on the Cerebral Vascular and Microvascular Response to Hypoxia, 1365

Perivascular fibrosis
Remodeling of the Rat Right and Left Ventricles in Experimental Hypertension, 1355

Permeability
Effects of Dextran 70 on Hemodynamics and Lung Liquid and Protein Exchange in Awake Sheep, 852

Pertussis toxin
Mechanism of Cytokine Inhibition of β-Adrenergic Agonist Stimulation of Cyclic AMP in Rat Cardiac Myocytes: Impairment of Signal Transduction, 753

Pertussis toxin–sensitive G protein
Enhanced α_1-Adrenergic Responsiveness in Cardiomyopathic Hamster Cardiac Myocytes: Relation to the Expression of Pertussis Toxin–Sensitive G Protein and α_1-Adrenergic Receptors, 1182

PH
Effect of Thyroid Status on Thin-Filament Ca^{2+} Regulation and Expression of Troponin I in Perinatal and Adult Rat Hearts, 344
H^+-Induced Vasodilation of Rat Aorta Is Mediated by Alterations in Intracellular Calcium Sequestration, 426

Phagocytosis
Pulmonary Edema Induced by Phagocytosing Neutrophils: Protective Effect of Monoclonal Antibody Against Phagocyte CD18 Integrin, 795

Pharmacokinetics
Studies of Recombinant Plasminogen Activator Inhibitor-1 in Rabbits: Pharmacokinetics and Evidence for Reactivation of Latent Plasminogen Activator Inhibitor-1 In Vivo, 1281

Phase-locking
Nonlinear Dynamics of Rate-Dependent Activation in Models of Single Cardiac Cells, 1510

Phenylalanine
In Vivo Measurement of Myocardial Protein Turnover Using an Indicator Dilution Technique, 902

Phorbol ester
Effect of Protein Kinase C Activation on Sarcoplasmic Reticulum Function and Apparent Myofibrillar Ca^{2+} Sensitivity in Intact and Skinned Muscles From Normal and Diseased Human Myocardium, 744
H^+-Induced Vasodilation of Rat Aorta Is Mediated by Alterations in Intracellular Calcium Sequestration, 426
Phospholamban and Troponin I Are Substrates for Protein Kinase C In Vitro but Not in Intact Beating Guinea Pig Hearts, 394

Phosphatidylinositol
Neurohormonal Control of Calcium Sensitivity of Myofilaments in Rat Single Heart Cells, 517

Phosphorylation
β-Adrenergic Regulation of the Muscarinic-Gated K^+ Channel via Cyclic AMP–Dependent Protein Kinase in Atrial Cells, 1292

Pinacidil
Interrelation Between Pinacidil and Intracellular ATP Concentrations on Activation of the ATP-Sensitive K^+ Current in Guinea Pig Ventricular Myocytes, 1124

Planar lipid bilayers
Biphasic Effects of Doxorubicin on the Calcium Release Channel From Sarcoplasmic Reticulum of Cardiac Muscle, 1167

Plasma expanders
Effects of Dextran 70 on Hemodynamics and Lung Liquid and Protein Exchange in Awake Sheep, 852

Plasma volume
High-Dose Atrial Natriuretic Factor Enhances Albumin Escape From the Systemic but Not the Pulmonary Circulation, 461

Plasminogen activator inhibitor-1
Studies of Recombinant Plasminogen Activator Inhibitor-1 in Rabbits: Pharmacokinetics and Evidence for Reactivation of Latent Plasminogen Activator Inhibitor-1 In Vivo, 1281

Platelet activating factor
Mechanisms of Pulmonary Edema Induced by Tumor Necrosis Factor-α, 68

Platelet aggregability
Temporal Effects of Thrombolytic Agents on Platelet Function In Vivo and Their Modulation by Prostaglandins, 1175

Platelets
Synergistic Inhibition of Platelet Aggregation by Fibrinogen-Related Peptides, 941

Polymerase chain reaction
Kallikrein Messenger RNA in Rat Arteries and Veins, 510

Polymorphonuclear leukocytes
Mechanisms of Pulmonary Edema Induced by Tumor Necrosis Factor-α, 68

Potassium
Impaired Potassium-Induced Dilation in Hypertensive Rat Cerebral Arteries Does Not Reflect Altered Na^+,K^+-ATPase Dilation, 1035

Potassium accumulation
Potassium Accumulation in the Globally Ischemic Mammalian Heart: A Role for the ATP-Sensitive Potassium Channel, 835

Potassium channels
Isolated Guinea Pig Coronary Smooth Muscle Cells: Acetylcholine Induces Hyperpolarization Due to Sarcoplasmic Reticulum Calcium Release Activating Potassium Channels, 525

Pregnancy
α_1-Adrenergic Receptors in Pulmonary and Systemic Vascular Smooth Muscle: Alterations With Development and Pregnancy, 1193

Preload
The Effects of Increasing Mean Arterial Pressure on Left Ventricular Output in Newborn Lambs, 78

Pressoreceptors
Dynamic and Static Conditioning Pressures Evoke Equivalent Rapid Resetting in Rat Aortic Baroreceptors, 303

Pressure-flow relation
Starling Resistor Versus Compliance: Which Explains the Zero-Flow Pressure of a Dynamic Arterial Pressure-Flow Relation?, 209

Pressure-volume area
Effects of Bigeminies and Paired-Pulse Stimulation on Oxygen Consumption in Dog Left Ventricle, 142
Heat Released During Relaxation Equals Force-Length Area in Isometric Contractions of Rabbit Papillary Muscle, 893

Prostacyclin
Prostaglandins Contribute to Activation of Baroreceptors in Rabbits: Possible Paracrine Influence of Endothelium, 1394

Prostacyclin synthesis
Forskolin Stimulates Prostaglandin Synthesis in Rabbit Heart by a Mechanism That Requires Calcium and Is Independent of Cyclic AMP, 1247

Prostaglandin modulation
Repeated Sympathetic Stimuli Elicit the Decline and Disappearance of Prostaglandin Modulation and an Increase of Vascular Resistance in Humans, 580
Prostaglandin-dependent vasocontractile response
Contractile Effect of the Chemotactic Factors f-Met-Leu-Phe and C5a on the Human Isolated Umbilical Artery: Role of Cyclooxygenase Products and Tissue Macrophages, 1059
Prostaglandins
Changes in Cerebrovascular Prostaglandins and Thromboxane as a Function of Systemic Blood Pressure: Cerebral Blood Flow Autoregulation of the Newborn, 674
Effect of Protein Intake on Regional Vascular Resistance and Reactivity to Angiotensin II in the Rat, 440
Repeated Sympathetic Stimuli Elicit the Decline and Disappearance of Prostaglandin Modulation and an Increase of Vascular Resistance in Humans, 580
Temporal Effects of Thrombolytic Agents on Platelet Function In Vivo and Their Modulation by Prostaglandins, 1175
Proteases
Pulmonary Edema Induced by Phagocytosing Neutrophils: Protective Effect of Monoclonal Antibody Against Phagocyte CD18 Integrin, 795
Protein kinase A
β-Adrenergic Regulation of the Muscarinic-Gated K^+ Channel via Cyclic AMP–Dependent Protein Kinase in Atrial Cells, 1292
Protein kinase C
Effect of Protein Kinase C Activation on Sarcoplasmic Reticulum Function and Apparent Myofibrillar Ca^{2+} Sensitivity in Intact and Skinned Muscles From Normal and Diseased Human Myocardium, 744
Neurohormonal Control of Calcium Sensitivity of Myofilaments in Rat Single Heart Cells, 517
Protein phosphorylation
Phospholamban and Troponin I Are Substrates for Protein Kinase C In Vitro but Not in Intact Beating Guinea Pig Hearts, 394
Protein turnover
In Vivo Measurement of Myocardial Protein Turnover Using an Indicator Dilution Technique, 902
Pulmonary arteries
α_1-Adrenergic Receptors in Pulmonary and Systemic Vascular Smooth Muscle: Alterations With Development and Pregnancy, 1193
Pulmonary edema
Effects of Dextran 70 on Hemodynamics and Lung Liquid and Protein Exchange in Awake Sheep, 852
Pulmonary Edema Induced by Phagocytosing Neutrophils: Protective Effect of Monoclonal Antibody Against Phagocyte CD18 Integrin, 795
Pulmonary model
Pulmonary Model to Predict the Effects of Series Ventricular Interaction, 1225
Pulmonary stretch reflexes
Influence of Lung Volume on Sympathetic Nerve Discharge in Normal Humans, 130
Pulmonary vascular bed
Analysis of Pulmonary Vascular Responses in Cats to Sympathetic Nerve Stimulation Under Elevated Tone Conditions: Evidence That Neuronally Released Norepinephrine Acts on α_1-, α_2-, and β_2-Adrenoceptors, 862
Pumping activity
Lymphatic Pumping in Response to Changes in Transmural Pressure Is Modulated by Erythrolysate/Hemoglobin, 1097
Purkinje fibers
Specific α_1-Adrenergic Receptor Subtypes Modulate Catecholamine-Induced Increases and Decreases in Ventricular Automaticity, 1535
Purinergic receptor
The Mechanism of Positive Inotropy Induced by Adenosine Triphosphate in Rat Heart, 1007

Q
Quin 2
Ouabain Increases the Calcium Concentration in Intracellular Stores Involved in Stimulus–Response Coupling in Human Platelets, 1494

R
Rabbit heart
Forskolin Stimulates Prostaglandin Synthesis in Rabbit Heart by a Mechanism That Requires Calcium and Is Independent of Cyclic AMP, 1247
Rabbits
Developmental Changes in Cardiac Myocyte Calcium Regulation, 574
Differential Alteration of Vascular Reactivity in Rabbit Aorta With Modest Elevation of Serum Cholesterol, 550
Experimental Sympathetic Activation Causes Endothelial Injury in the Rabbit Thoracic Aorta via β_1-Adrenoceptor Activation, 1027
Role of the Area Postrema in the Modulation of the Baroreflex Control of Heart Rate by Angiotensin II, 1462
Temporal Effects of Thrombolytic Agents on Platelet Function In Vivo and Their Modulation by Prostaglandins, 1175
Radiofrequency energy
Electrode Radius Predicts Lesion Radius During Radiofrequency Energy Heating: Validation of a Proposed Thermodynamic Model, 124
Rapid resetting
Dynamic and Static Conditioning Pressures Evoke Equivalent Rapid Resetting in Rat Aortic Baroreceptors, 303
Rats
Effect of Chemodenervation on the Cerebral Vascular and Microvascular Response to Hypoxia, 1365
High-Dose Atrial Natriuretic Factor Enhances Albumin Escape From the Systemic but Not the Pulmonary Circulation, 461
Reactivation
Studies of Recombinant Plasminogen Activator Inhibitor-1 in Rabbits: Pharmacokinetics and Evidence for Reactivation of Latent Plasminogen Activator Inhibitor-1 In Vivo, 1281
Reactive hyperemia
Dynamic Relation Between Myocardial Contractility and Energy Metabolism During and Following Brief Coronary Occlusion in the Pig, 490
Recanalization
In Vivo Thrombin Inhibition Enhances and Sustains Arterial Recanalization With Recombinant Tissue-type Plasminogen Activator, 1552
Recovery
Energy Demand, Supply, and Utilization in Hypoxia, and Force Recovery After Reoxygenation in Rabbit Heart Muscle, 1089
Reentry
β-Adrenergic–Mediated Influences on Microscopic Conduction in Epicardial Regions Overlying Infarcted Myocardium, 284
Circus Movement Atrial Flutter in the Canine Sterile Pericarditis Model: Activation Patterns During Initiation, Termination, and Sustained Reentry In Vivo, 35
Refractory period
Vasoactive Intestinal Polypeptide Facilitates Atrioventricular Nodal Conduction and Shortens Atrial and Ventricular Refractory Periods in Conscious and Anesthetized Dogs, 1323
Regional difference
Regional Changes in Creatine Kinase and Myocyte Size in Hypertensive and Nonhypertensive Cardiac Hypertrophy, 1334
Regional coronary reserve
Profound Spatial Heterogeneity of Coronary Reserve: Discordance Between Patterns of Resting and Maximal Myocardial Blood Flow, 319
Regional ischemia
Exacerbation of Reperfusion Arrhythmias by Sudden Oxidant Stress, 481

Regression of hypertrophy
Collagen Phenotypes During Development and Regression of Myocardial Hypertrophy in Spontaneously Hypertensive Rats, 1474
Renal artery
Brain Natriuretic Peptide–like Immunoreactive Innervation of the Cardiovascular and Cerebrovascular Systems in the Rat, 1345
Renal autoregulation
Determinants of Renal Actions of Atrial Natriuretic Peptide: Lack of Effect of Atrial Natriuretic Peptide on Pressure-Induced Vasoconstriction, 1
Renal circulation
Determinants of Renal Actions of Atrial Natriuretic Peptide: Lack of Effect of Atrial Natriuretic Peptide on Pressure-Induced Vasoconstriction, 1
Effect of Protein Intake on Regional Vascular Resistance and Reactivity to Angiotensin II in the Rat, 440
Renal sympathetic nerve activity
Baroreflex Control of Renal Sympathetic Nerve Activity Is Potentiated at Early Phase of Two-Kidney, One-Clip Goldblatt Hypertension in Conscious Rabbits, 1309
Renal vascular resistance
Determinants of Renal Actions of Atrial Natriuretic Peptide: Lack of Effect of Atrial Natriuretic Peptide on Pressure-Induced Vasoconstriction, 1
Renin
Cardiac Angiotensinogen and Its Local Activation in the Isolated Perfused Beating Heart, 564
Peripheral Chemoreceptor Control of Fetal Renin Responses to Hypoxia and Hypercapnia, 722
Renin-angiotensin system
Cardiac Angiotensinogen and Its Local Activation in the Isolated Perfused Beating Heart, 564
Renin-angiotensin-aldosterone system
Angiotensin II–Induced Atrial Natriuretic Factor Release in Dogs Is Not Related to Hemodynamic Responses, 774
Renovascular hypertension
Remodeling of the Rat Right and Left Ventricles in Experimental Hypertension, 1355
Reperfusion
Evidence Against the "Early Protection–Delayed Death" Hypothesis of Superoxide Dismutase Therapy in Experimental Myocardial Infarction: Polyethylene Glycol–Superoxide Dismutase Plus Catalase Does Not Limit Myocardial Infarct Size in Dogs, 636
Exacerbation of Reperfusion Arrhythmias by Sudden Oxidant Stress, 481
Oxidative Stress Alters Specific Membrane Currents in Isolated Cardiac Myoctyes, 535
Reperfusion and Readmission of Oxygen: Pathophysiological Relevance of Oxygen-Derived Free Radicals to Arrhythmogenesis, 1211
Time Course of Cellular Enzyme Release in Dog Heart Injury, 1257
Resistance vessels
Age-Related Decrease of Calcitonin Gene-Related Peptide–Containing Vasodilator Innervation in the Mesenteric Resistance Vessel of the Spontaneously Hypertensive Rat, 733
L-Arginine Augments Endothelium-Dependent Vasodilation in Cholesterol-Fed Rabbits, 1301
Respiratory acidosis
Acute Respiratory Acidosis Decreases Left Ventricular Contractility but Increases Cardiac Output in Dogs, 628
Ribose
β-Adrenergic Agonists Stimulate the Oxidative Pentose Phosphate Pathway in the Rat Heart, 1525
Right heart overload
Effects of Coronary Venous Pressure on Left Ventricular Diastolic Distensibility, 923
Right ventricle
Ellipsoidal Shell Subtraction Model of Right Ventricular Volume: Comparison With Regional Free Wall Dimensions as Indexes of Right Ventricular Function, 1427
Ryanodine
Developmental Changes in Cardiac Myocyte Calcium Regulation, 574
Sarcolemma, Sarcoplasmic Reticulum, and Sarcomeres As Limiting Factors in Force Production in Rat Heart, 913

S
Safety factor
Directional Differences in Excitability and Margin of Safety for Propagation in Sheep Ventricular Epicardial Muscle, 97
Sarcolemmal calcium
Developmental Changes in Cardiac Myocyte Calcium Regulation, 574
Sarcomere length
Sarcolemma, Sarcoplasmic Reticulum, and Sarcomeres As Limiting Factors in Force Production in Rat Heart, 913
Sarcoplasmic reticulum
Age-Induced Decreases in the Messenger RNA Coding for the Sarcoplasmic Reticulum Ca^{2+}-ATPase of the Rat Heart, 230
Biphasic Effects of Doxorubicin on the Calcium Release Channel From Sarcoplasmic Reticulum of Cardiac Muscle, 1167
Developmental Changes in Cardiac Myocyte Calcium Regulation, 574
Digestion of Cardiac and Skeletal Muscle Junctional Sarcoplasmic Reticulum Vesicles With Calpain II: Effects on the Ca^{2+} Release Channel, 84
Patterns of Interaction Between Anthraquinone Drugs and the Calcium-Release Channel from Cardiac Sarcoplasmic Reticulum, 272
Secretion
Dynamics of Atrial Peptide Secretion in the Coronary Circulation of the Conscious Dog, 609
Serotonin
Acute Impairment of Endothelium-Dependent Relaxations to Aggregating Platelets Following Reperfusion Injury in Canine Coronary Arteries, 385
Serotonin receptors
Stimulation of Serotonin$_2$ Receptors in the Ventrolateral Medulla of the Cat Results in Nonuniform Increases in Sympathetic Outflow, 1267
Serum albumin
High-Dose Atrial Natriuretic Factor Enhances Albumin Escape From the Systemic but Not the Pulmonary Circulation, 461
Single ion channels
Biphasic Effects of Doxorubicin on the Calcium Release Channel From Sarcoplasmic Reticulum of Cardiac Muscle, 1167
Singlet oxygen
Exacerbation of Reperfusion Arrhythmias by Sudden Oxidant Stress, 481
Sinoatrial node
Effects of the Spatial Dispersion of Acetylcholine Release on the Chronotropic Responses to Vagal Stimulation in Dogs, 844
Skinned cells
Neurohormonal Control of Calcium Sensitivity of Myofilaments in Rat Single Heart Cells, 517
Skinned fiber
Effect of Protein Kinase C Activation on Sarcoplasmic Reticulum Function and Apparent Myofibrillar Ca^{2+} Sensitivity in Intact and Skinned Muscles From Normal and Diseased Human Myocardium, 744
Skinned muscles
Differential Effects of Cardiac Hypertrophy and Failure on Right Versus Left Ventricular Calcium Activation, 707
Smooth muscle cells
Integrin Receptors on Aortic Smooth Muscle Cells Mediate Adhesion to Fibronectin, Laminin, and Collagen, 175
Time Course of Smooth Muscle Cell Proliferation in the Intima and Media of Arteries Following Experimental Angioplasty, 651
Sodium pump
Impaired Potassium-Induced Dilation in Hypertensive Rat Cerebral Arteries Does Not Reflect Altered Na^+,K^+-ATPase Dilation, 1035

Species differences
Species-Dependent Effects of Adenosine on Heart Rate and Atrioventricular Nodal Conduction: Mechanism and Physiological Implications, 960
Xanthine Oxidoreductase Activity in Perfused Hearts of Various Species, Including Humans, 770
Spin-lattice relaxation
Potassium-39 Nuclear Magnetic Resonance Observation of Intracellular Potassium Without Chemical Shift Reagents During Metabolic Inhibition in the Isolated Perfused Rat Heart, 401
Spontaneously hypertensive rats
Age-Related Decrease of Calcitonin Gene-Related Peptide–Containing Vasodilator Innervation in the Mesenteric Resistance Vessel of the Spontaneously Hypertensive Rat, 733
Diabetes-Induced Alterations in Atrial Natriuretic Peptide Gene Expression in Wistar-Kyoto and Spontaneously Hypertensive Rats, 803
Differential Effects of Cardiac Hypertrophy and Failure on Right Versus Left Ventricular Calcium Activation, 707
Starling resistor
Starling Resistor Versus Compliance: Which Explains the Zero-Flow Pressure of a Dynamic Arterial Pressure-Flow Relation?, 209
Stenosis
Correlation Between Transmural High Energy Phosphate Levels and Myocardial Blood Flow in the Presence of Graded Coronary Stenosis, 660
Stimulus–response coupling
Ouabain Increases the Calcium Concentration in Intracellular Stores Involved in Stimulus–Response Coupling in Human Platelets, 1494
Streptokinase
Temporal Effects of Thrombolytic Agents on Platelet Function In Vivo and Their Modulation by Prostaglandins, 1175
Strontium
Sarcolemma, Sarcoplasmic Reticulum, and Sarcomeres As Limiting Factors in Force Production in Rat Heart, 913
Subretrofacial nucleus
Stimulation of Serotonin$_2$ Receptors in the Ventrolateral Medulla of the Cat Results in Nonuniform Increases in Sympathetic Outflow, 1267
Superoxide
Exacerbation of Reperfusion Arrhythmias by Sudden Oxidant Stress, 481
Sympathetic activation
Experimental Sympathetic Activation Causes Endothelial Injury in the Rabbit Thoracic Aorta via β_1-Adrenoceptor Activation, 1027
Sympathetic nervous system
Influence of Lung Volume on Sympathetic Nerve Discharge in Normal Humans, 130
Reflex Effect of Vasopressin After Blockade of V_1 Receptors in the Area Postrema, 265
Sinus and Atrioventricular Nodal Distribution of Sympathetic Fibers That Contain Neuropeptide Y, 713
Sympathetic neuropeptide-Y depletion
Attenuation of Long-Lasting Effects of Sympathetic Stimulation After Repeated Stimulation, 193
Sympathetic stimulation
Repeated Sympathetic Stimuli Elicit the Decline and Disappearance of Prostaglandin Modulation and an Increase of Vascular Resistance in Humans, 580

T
Tetanization
Effect of Protein Kinase C Activation on Sarcoplasmic Reticulum Function and Apparent Myofibrillar Ca^{2+} Sensitivity in Intact and Skinned Muscles From Normal and Diseased Human Myocardium, 744
Thermodynamic model
Electrode Radius Predicts Lesion Radius During Radiofrequency Energy Heating: Validation of a Proposed Thermodynamic Model, 124
Thrombin
Comparative Behavior of Thrombin and an Inactive Derivative, FPR-Thrombin, Toward the Rabbit Vascular Endothelium: Heparin Liberates FPR-Thrombin From the Endothelium In Vivo, 221
Thrombosis
Acute Impairment of Endothelium-Dependent Relaxations to Aggregating Platelets Following Reperfusion Injury in Canine Coronary Arteries, 385
Effects of Thrombosis on Vascular Tone in Rat Mesenteric Arteries With Endothelium In Vivo, 312
Synergistic Inhibition of Platelet Aggregation by Fibrinogen-Related Peptides, 941
Thromboxane
Changes in Cerebrovascular Prostaglandins and Thromboxane as a Function of Systemic Blood Pressure: Cerebral Blood Flow Autoregulation of the Newborn, 674
Characterization of the Vascular Thromboxane A_2/Prostaglandin Endoperoxide Receptor in Rabbit Aorta: Regulation by Dexamethasone, 1562
Thromboxane A_2
Mechanisms of Pulmonary Edema Induced by Tumor Necrosis Factor-α, 68
Time-varying elastance
Heat Released During Relaxation Equals Force-Length Area in Isometric Contractions of Rabbit Papillary Muscle, 893
Tissue-type plasminogen activator
Temporal Effects of Thrombolytic Agents on Platelet Function In Vivo and Their Modulation by Prostaglandins, 1175
Torso geometry
The Magnetocardiogram as Derived From Electrocardiographic Data, 1503
Total cardiac blood flow
Dynamics of Atrial Peptide Secretion in the Coronary Circulation of the Conscious Dog, 609
Tracer protein equilibration
Effects of Dextran 70 on Hemodynamics and Lung Liquid and Protein Exchange in Awake Sheep, 852
Transient outward current
Differences in Transient Outward Currents of Feline Endocardial and Epicardial Myocytes, 1287
Transmural blood flow
Correlation Between Transmural High Energy Phosphate Levels and Myocardial Blood Flow in the Presence of Graded Coronary Stenosis, 660
Tumor necrosis factor-α
Mechanisms of Pulmonary Edema Induced by Tumor Necrosis Factor-α, 68
Turbulence
An In Vitro Study of the Onset of Turbulence in the Sinus of Valsalva, 448
Two-kidney one-clip hypertension
Regional Changes in Creatine Kinase and Myocyte Size in Hypertensive and Nonhypertensive Cardiac Hypertrophy, 1334

U
Ultrasonic Doppler spectrum analysis
Detection of Moving Flow Separation in Pulsatile Flow and the Degree of Stenosis by Power of Doppler Shift Signals, 166
Ultrastructure
Effect of Amiodarone on the Expression of Myosin Isoforms and Cellular Growth of Cardiac Muscle Cells in Culture, 51
Umbilical artery
Contractile Effect of the Chemotactic Factors f-Met-Leu-Phe and C5a on the Human Isolated Umbilical Artery: Role of Cyclooxygenase Products and Tissue Macrophages, 1059
Urate
Xanthine Oxidoreductase Activity in Perfused Hearts of Various Species, Including Humans, 770

V

Vagus
Vagal Modulation of the Rate-Dependent Properties of the Atrioventricular Node, 1152

Vagus heart
Attenuation of Long-Lasting Effects of Sympathetic Stimulation After Repeated Stimulation, 193

Vascular permeability
Time Course of Cellular Enzyme Release in Dog Heart Injury, 1257

Vascular reactivity
Differential Alteration of Vascular Reactivity in Rabbit Aorta With Modest Elevation of Serum Cholesterol, 550

Vascular receptors
Characterization of the Vascular Thromboxane A_2/Prostaglandin Endoperoxide Receptor in Rabbit Aorta: Regulation by Dexamethasone, 1562

Vascular resistance
Effect of Changes in Circulating Blood Volume on Cardiac Output and Arterial and Ventricular Blood Pressure in the Stage 18, 24, and 29 Chick Embryo, 187

Vascular smooth muscle cells
Actions of Ca^{2+} Antagonists on Two Types of Ca^{2+} Channels in Rat Aorta Smooth Muscle Cells in Primary Culture, 469
H^+-Induced Vasodilation of Rat Aorta Is Mediated by Alterations in Intracellular Calcium Sequestration, 426
Integrin Receptors on Aortic Smooth Muscle Cells Mediate Adhesion to Fibronectin, Laminin, and Collagen, 175
Intracellular pH in Human Arterial Smooth Muscle: Regulation by Na^+/H^+ Exchange and a Novel 5-(*N*-Ethyl-*N*-isopropyl) amiloride–Sensitive Na^+- and HCO_3^--Dependent Mechanism, 814
Isolated Guinea Pig Coronary Smooth Muscle Cells: Acetylcholine Induces Hyperpolarization Due to Sarcoplasmic Reticulum Calcium Release Activating Potassium Channels, 525
Kallikrein Messenger RNA in Rat Arteries and Veins, 510
N^G-Monomethyl L-Arginine Inhibits Endothelium-Derived Relaxing Factor–Stimulated Cyclic GMP Accumulation in Cocultures of Endothelial and Vascular Smooth Muscle Cells by an Action Specific to the Endothelial Cell, 979

Vascular tissue
Kallikrein Messenger RNA in Rat Arteries and Veins, 510

Vasoactive intestinal polypeptide
Synergistic Hypotensive Effect of Vasoactive Intestinal Polypeptide and α-Blockade With Phentolamine: Evidence for Vasoactive Intestinal Peptide α-Adrenoceptor Coupling in the Cardiovascular System of Newborn Dogs, 986
Vasoactive Intestinal Polypeptide Facilitates Atrioventricular Nodal Conduction and Shortens Atrial and Ventricular Refractory Periods in Conscious and Anesthetized Dogs, 1323

Vasoactivity
5,6-Epoxyeicosatrienoic Acid, a Novel Arachidonate Metabolite: Mechanism of Vasoactivity in the Rat, 1082

Vasoconstriction
Effects of Thrombosis on Vascular Tone in Rat Mesenteric Arteries With Endothelium In Vivo, 312

Vasodilator nerves
Age-Related Decrease of Calcitonin Gene-Related Peptide–Containing Vasodilator Innervation in the Mesenteric Resistance Vessel of the Spontaneously Hypertensive Rat, 733

Vasodilator reserve
Nonuniform Loss of Regional Flow Reserve During Myocardial Ischemia in Dogs, 253

Vasopressin
Characterization of Vasopressin Actions in Isolated Submucosal Arterioles of the Intestinal Microcirculation, 1017
Reflex Effect of Vasopressin After Blockade of V_1 Receptors in the Area Postrema, 265

Vasospasm
Acute Impairment of Endothelium-Dependent Relaxations to Aggregating Platelets Following Reperfusion Injury in Canine Coronary Arteries, 385

Venous return
Acute Respiratory Acidosis Decreases Left Ventricular Contractility but Increases Cardiac Output in Dogs, 628

Ventricle
Brain Natriuretic Peptide–like Immunoreactive Innervation of the Cardiovascular and Cerebrovascular Systems in the Rat, 1345
Differences in the Electrophysiological Response of Canine Ventricular Subendocardium and Subepicardium to Acetylcholine and Isoproterenol: A Direct Effect of Acetylcholine in Ventricular Myocardium, 615

Ventricular arrhythmias
Effects of Bigeminies and Paired-Pulse Stimulation on Oxygen Consumption in Dog Left Ventricle, 142

Ventricular automaticity
Specific α_1-Adrenergic Receptor Subtypes Modulate Catecholamine-Induced Increases and Decreases in Ventricular Automaticity, 1535

Ventricular defibrillation
Increasing Fibrillation Duration Enhances Relative Asymmetrical Biphasic Versus Monophasic Defibrillator Waveform Efficacy, 376

Ventricular diastolic dysfunction
Effects of Coronary Venous Pressure on Left Ventricular Diastolic Distensibility, 923

Ventricular fibrillation
Intrathoracic Current Flow During Transthoracic Defibrillation in Dogs: Transcardiac Current Fraction, 1405
Relation Between Transcardiac and Transthoracic Current During Defibrillation in Humans, 1420
Reperfusion and Readmission of Oxygen: Pathophysiological Relevance of Oxygen-Derived Free Radicals to Arrhythmogenesis, 1211
Role of Calcium and the Calcium Channel in the Initiation and Maintenance of Ventricular Fibrillation, 1115

Ventricular function
Ellipsoidal Shell Subtraction Model of Right Ventricular Volume: Comparison With Regional Free Wall Dimensions as Indexes of Right Ventricular Function, 1427
The Effects of Increasing Mean Arterial Pressure on Left Ventricular Output in Newborn Lambs, 78

Ventricular interaction
Ellipsoidal Shell Subtraction Model of Right Ventricular Volume: Comparison With Regional Free Wall Dimensions as Indexes of Right Ventricular Function, 1427
Pulmonary Model to Predict the Effects of Series Ventricular Interaction, 1225

Ventricular myocardium
Directional Differences in Excitability and Margin of Safety for Propagation in Sheep Ventricular Epicardial Muscle, 97

Ventricular myocytes
Oxidative Stress Alters Specific Membrane Currents in Isolated Cardiac Myoctyes, 535

Verapamil
Chronic Calcium Channel Blockade Prevents the Progression of Myocardial Contractile and Electrical Dysfunction in the Cardiomyopathic Syrian Hamster, 1381

Viral myocarditis
Expression of Major Histocompatibility Complex Class I Antigen in Murine Ventricular Myocytes Infected With Coxsackievirus B3, 360

Viscoelasticity
Diastolic Viscous Properties of the Intact Canine Left Ventricle, 352

Von Willebrand factor
Synergistic Inhibition of Platelet Aggregation by Fibrinogen-Related Peptides, 941

Vortex shedding
Detection of Moving Flow Separation in Pulsatile Flow and the Degree of Stenosis by Power of Doppler Shift Signals, 166

W

Wall motion abnormality
Patterns of Body Surface Potential and Ventriculograms Specific to Occlusion of Subdivisions of the Coronary Arteries, 683

Wall stress
Calculation of Left Ventricular Wall Stress, 245
Prostaglandins Mediate Arteriolar Dilation to Increased Blood Flow Velocity in Skeletal Muscle Microcirculation, 529
Side-to-Side Slippage of Myocytes Participates in Ventricular Wall Remodeling Acutely After Myocardial Infarction in Rats, 23

Whole-cell clamp method
Actions of Ca^{2+} Antagonists on Two Types of Ca^{2+} Channels in Rat Aorta Smooth Muscle Cells in Primary Culture, 469

Wound healing
Influence of Extracellular Magnesium on Capillary Endothelial Cell Proliferation and Migration, 645

X

Xanthine oxidase
Xanthine Oxidoreductase Activity in Perfused Hearts of Various Species, Including Humans, 770
